

CHAPTER VII

SHORELAND AND FLOODPLAIN ZONING ORDINANCE

SECTION 7.0100 INTRODUCTION

7.0101 AUTHORITY

This ordinance is adopted pursuant to the authority granted by Sections 59.69, 59.692, 59.694, and Section 236.45, and the requirements of Section 87.30 of the Wisconsin Statutes.

7.0102 TITLE

This ordinance shall be known as, referred to, and cited as the "OZAUKEE COUNTY SHORELAND AND FLOODPLAIN ZONING ORDINANCE" and hereinafter referred to as the "Ordinance."

7.0103 FINDINGS

Uncontrolled use of the shorelands, shoreland-wetlands, floodplains, and navigable waters of Ozaukee County would adversely affect the public health, safety, convenience, and general welfare and impair the tax base. The Wisconsin Legislature has delegated to the counties responsibility within unincorporated areas to further the maintenance of safe and healthful conditions, prevent and control water pollution, protect aquatic life and habitat, and preserve shore cover and natural beauty. This responsibility is hereby accepted by Ozaukee County, Wisconsin.

7.0104 PURPOSE

For the purpose of promoting the public health, safety, convenience, and general welfare, this ordinance has been established to:

- A. Further the Maintenance of safe and healthful conditions and prevent and control water pollution by limiting structures to those areas where soil and geological conditions will provide a safe foundation; establishing setbacks and minimum lot sizes and widths to provide adequate area for open space, privacy, and private onsite waste treatment systems; and controlling filling and grading to prevent flooding and serious soil erosion problems.
- B. Protect Fish and Other Aquatic Life by preserving spawning grounds, wetlands, and other fish and aquatic habitat; regulating pollution sources; and controlling shoreline and channel alterations, dredging, and lagooning.
- C. Preserve Natural Beauty along shorelines by restricting the removal of natural shoreland cover, preventing shoreline encroachment by boathouses and other structures, and controlling shoreline excavation and other earth-moving activities.
- D. Prevent Flood Damage to persons and property; protect life, health and property; minimize expenditures of public funds for costly flood control projects; minimize rescue and relief efforts, generally undertaken at the expense of the tax-paying public; minimize business interruptions, which often result in the loss of local incomes; minimize damage to public facilities such as water mains, sewer lines, streets, and bridges within floodplains; minimize the occurrence of future flood blight areas within floodplains; discourage the victimization of unwary land and home buyers; and prevent increases in flood heights that could increase flood damage and result in conflicts among landowners.

- E. Limit Development in a floodplain unless there is no practicable alternative to locate the activity, use, or structure outside of the floodplain.
- F. Establish Minimum lot sizes and widths, building setbacks from navigable waters, and shoreland buffer standards to limit cumulative impacts to aquatic life habitat and water quality.

7.0105 ABROGATION AND GREATER RESTRICTIONS

- A. It is Not Intended by this Ordinance to repeal, abrogate, annul, impair, or interfere with any existing easements, deed restrictions, covenants, agreements, ordinances, rules, regulations, or permits previously adopted or issued pursuant to law. However, where this ordinance imposes greater restrictions, the provisions of this ordinance shall govern.
- B. Where a Town, Village, or City Ordinance is more restrictive than this ordinance, that ordinance shall continue in full force and effect to the extent of the greater restrictions, but not otherwise.
- C. This Ordinance Shall Not Require Approval or be subject to disapproval by any Town or Town Board.

7.0106 INTERPRETATION

In the interpretation and application of this ordinance, the provisions of this ordinance shall be held to be the minimum requirements and shall be liberally construed in favor of the County and shall not be construed to be a limitation or repeal of any other power granted by the Wisconsin Statutes, as may be amended from time to time, or now possessed by Ozaukee County. Where a provision of this ordinance is required under Chapters NR 115 or NR 116 of the Wisconsin Administrative Code, and where a provision of this ordinance is unclear, the provision shall be interpreted in light of the requirements of Chapters NR 115 and NR 116 in effect on the date this ordinance was adopted or the date of the most recent text amendment to this ordinance.

7.0107 SEVERABILITY

- A. If Any Portion of this ordinance is adjudged unconstitutional or invalid by a court of competent jurisdiction, the remainder of this ordinance shall not be affected thereby.
- B. If Any Application of this ordinance to a particular structure, land, water, or air is adjudged unconstitutional or invalid by a court of competent jurisdiction, such judgment shall not be applicable to any other structure, land, water, or air not specifically included in said judgment.

7.0108 WARNING AND DISCLAIMER OF LIABILITY

The flood protection and bluff and ravine erosion standards in this ordinance are based on engineering experience and scientific research. Larger floods may occur or the flood height may be increased by human-made or natural causes, such as ice jams or bridge openings restricted by debris. Erosion rates may be increased by human-made or natural causes such as major storms or high lake levels. These regulations do not guarantee nor warrant that development in compliance with ordinance terms will be free from flood or erosion damage. Nor does this ordinance create liability on the part of, or a cause of action against, Ozaukee County or any officer or employee thereof for any flood or erosion damage that may result from reliance on this ordinance.

SECTION 7.0200 GENERAL PROVISIONS

7.0201 AREAS TO BE REGULATED

- A. The Provisions of this Ordinance shall apply to all shoreland areas within the unincorporated areas of Ozaukee County, Wisconsin, and to those annexed shoreland areas described in Section 7.0202. The shoreland includes all lands within the following distances from the ordinary high water mark of navigable waters:
1. One thousand (1,000) feet from a lake, pond or flowage. If the navigable water is a glacial pothole lake, this distance shall be measured from the high water mark of the lake.
 2. Three hundred (300) feet from a river or stream, or to the landward side of the floodplain, whichever distance is greater.
- B. The Provisions of this Ordinance shall further apply to all unincorporated areas of Ozaukee County that would be covered by the regional flood or base flood, including floodplain islands where emergency rescue and relief routes would be inundated by the regional flood.
- C. Determinations of Navigability shall be made by the appropriate office of the Wisconsin Department of Natural Resources (DNR).
- D. Determination of the Location of the Ordinary High Water Mark shall be made by the Ozaukee County Zoning Administrator in consultation with the DNR.
- E. Farm Drainage Ditches:
1. In accordance with Section 281.31(2m) of the Wisconsin Statutes, this ordinance shall not apply to lands adjacent to farm drainage ditches if all of the following apply:
 - (a) Such lands are not adjacent to a natural navigable stream or river.
 - (b) Those parts of the drainage ditches adjacent to such lands were not navigable before ditching.
 - (c) Such lands are maintained in nonstructural agricultural use.
 2. If any of the conditions set forth in paragraph 1 above cease to apply, then this exception shall expire and the provisions and the jurisdiction of this ordinance shall apply.
- F. Zoning Maps. The maps designated below are hereby adopted and made part of this ordinance. They are on file in the office of the Zoning Administrator for Ozaukee County.
1. Digital Shoreland and Floodplain Zoning Maps for all unincorporated portions of Ozaukee County as prepared by the Southeastern Wisconsin Regional Planning Commission in 2010, with subsequent amendments approved by the County Board in accordance with Section 7.1100. (10-1)
 2. The 2005 Wisconsin Wetland Inventory Maps. (10-1)
 3. The Digital FEMA Flood Insurance Rate Maps (panels 17, 18, 19, 36, 37, 38, 39, 41, 42, 43, 44, 61, 62, 63, 64, 70, 81, 82, 83, 84, 91, 92, 93, 94, 101, 102, 103, 104, 106, 107, 108, 109, 111, 112, 113, 114, 116, 117, 118, 119, 126, 127, 128, 129, 131, 133, 136, 137, 138, 156, 157, 158, 159, 166, 167, 168, 169, 176, 177, 178, 179, 181, 182, 183, 184, 186, 187, 188, 189, 191, 192, 193, 194 and 205) for Ozaukee County, with corresponding profiles and the Flood Insurance Study from FEMA dated December 4, 2007.
 4. United States Geological Survey Quadrangle Maps, 7-1/2 minute series, scale one inch equals 2,000 feet, covering Ozaukee County.

5. Floodplain map dated October 4, 2007 titled “Cedar Creek/Milwaukee River Dambreak Hazard Map.”
6. Flood profiles, titled “Dambreak Hazard Profile,” dated October 4, 2007.
7. Floodway data table dated October 4, 2007, titled “Floodway Data”.

7.0202 ANNEXED AREAS

Whenever any area which has been subject to the Ozaukee County Shoreland and Floodplain Zoning Ordinance petitions to become part of a village or city, the requirements of Section 59.692 (7) of the Wisconsin Statutes shall apply to any annexed areas.

7.0203 COMPLIANCE

The use of any land or water; the size, shape, and placement of lots; the use, size, type, and location of structures on lots; the installation and maintenance of water supply and waste disposal facilities; the filling, grading, lagooning, or dredging of any lands; the cutting of shoreland vegetation; and the division of land; shall be in full compliance with the terms of this ordinance and other applicable local, state, or federal regulations. Buildings, signs, and other structures shall require a permit unless otherwise expressly excluded by a provision of this ordinance. Landowners, builders, and contractors are responsible for compliance with the terms of this ordinance.

7.0204 GENERAL DEVELOPMENT STANDARDS

The Zoning Administrator shall review all permit applications to determine whether proposed building sites will be located within the 100-year floodplain. If a proposed building site is located within the 100-year floodplain, all new construction and substantial improvements shall be designed or modified and adequately anchored to prevent flotation, collapse, or lateral movement of the structure resulting from hydrodynamic and hydrostatic loads; be constructed with materials resistant to flood damage; be constructed by methods and practices that minimize flood damages; and be constructed with electrical, heating, ventilation, plumbing, and air conditioning equipment and other service facilities designed and/or located so as to prevent water from entering or accumulating within the components during conditions of flooding. Subdivisions shall be reviewed for compliance with the above standards. All subdivision proposals, including manufactured home subdivisions, shall include regional flood elevation and floodway data for any development that meets the definition of a subdivision as defined in Section 7.1300.

7.0205 CONCURRENT DISTRICTS

Areas which are located within the shoreland-wetland district and a floodplain district shall be regulated by the requirements of each applicable district, and where any applicable requirements are inconsistent, the more restrictive shall apply.

7.0206 MUNICIPAL, COUNTY, AND STATE AGENCIES REGULATED

Unless specifically exempted by law, all cities, villages, towns, and counties are required to comply with this ordinance and obtain all necessary permits. State agencies are required to comply when Section 13.48 (13) of the Wisconsin Statutes applies. The construction, reconstruction, maintenance, and repair of state highways and bridges by the Wisconsin Department of Transportation are exempt when Section 30.12 (4) of the Wisconsin Statutes applies.

7.0207 COMPLIANCE WITH THE AMERICANS WITH DISABILITIES ACT

Where strict interpretation of this ordinance would effectively deny disabled persons equal housing opportunity, the Zoning Administrator may grant a stipulated permit as provided under Section 7.0905 to provide reasonable accommodation as required by the Americans with Disabilities Act. The permit shall be subject to the following conditions, in addition to any others imposed by the Zoning Administrator:

- A. Only the Minimum Relaxation of dimensional or other standards needed to provide reasonable accommodation shall be approved.
- B. No Use, Structure, or other relaxation of standards shall be approved that would violate or undermine the purposes of this ordinance as set forth in Section 7.0104.
- C. Nonconforming Accessory Structures and nonconforming access ramps shall be removed once the property is no longer primarily used by a disabled person. The landowner who receives the permit shall be responsible for the removal of any nonconforming structures no longer required by a disabled resident. Structural modifications made to a principal structure to accommodate a disabled person are exempt from this requirement.

7.0208 SANITARY REGULATIONS

- A. No Private Water Supply or Onsite Wastewater Treatment System or parts thereof shall be located, installed, moved, reconstructed, extended, enlarged, converted, or substantially altered or their use changed without a Sanitary Permit and without full compliance with Chapter IX, Sanitation and Health, of the County Code of Ordinances. Private well construction shall conform to the requirements of Chapter NR 812 of the Wisconsin Administrative Code.
- B. No Zoning Permit shall be issued until a safe and adequate water supply and wastewater treatment system is assured and a Sanitary Permit issued.
- C. Private Onsite Wastewater Treatment Systems (POWTS) shall meet the following criteria:
 - 1. POWTS shall be located not less than 50 feet from the ordinary high water mark of navigable waters.
 - 2. POWTS shall not be located within a floodplain.

SECTION 7.0300 LOT, SITE, AND SETBACK REQUIREMENTS

7.0301 NO FILLING IN FLOODPLAIN AREAS

For lots created after the effective date of this ordinance, no filling shall be permitted within the floodplain to accommodate those uses listed in Section 7.0709.D unless a variance is granted by the Board of Adjustment in accordance with Section 7.1006.

7.0302 LOTS NOT SERVED BY PUBLIC SANITARY SEWER

The minimum lot area shall be 20,000 square feet and the minimum average lot width shall be 100 feet, with at least 100 feet of frontage at the ordinary high water mark.

7.0303 LOTS SERVED BY PUBLIC SANITARY SEWER

The minimum lot area shall be 10,000 square feet and the minimum average lot width shall be 65 feet, with at least 65 feet of frontage at the ordinary high water mark.

7.0304 EXISTING SUBSTANDARD LOTS

A. Substandard Lots Served By Public Sanitary Sewer. A substandard lot served by a public sanitary sewer which is at least 7,500 square feet in area and is at least 50 feet in width at the building setback line and at least 50 feet in width at the ordinary high water mark may be used as a building site for a single family dwelling upon issuance of a zoning permit by the Zoning Administrator, provided all of the following requirements are met:

1. The lot was on record in the Office of the Register of Deeds office prior to the effective date of the County Shoreland Zoning Ordinance adopted on August 6, 1986.
2. The lot was in separate ownership from abutting lands prior to August 6, 1986. If abutting lands and the substandard lot were owned by the same owner as of August 6, 1986, the substandard lot shall not be sold or used without full compliance with the terms of this ordinance, including the minimum area and width requirements set forth in Sections 7.0302 and 7.0303.

B. Substandard Lots Not Served By Public Sanitary Sewer. A substandard lot not served by public sanitary sewer which is at least 10,000 square feet in area and at least 65 feet in width at the building setback line and at least 65 feet in width at the ordinary high water mark may be used as a building site for a single-family dwelling upon issuance of a zoning permit by the Zoning Administrator if it meets all of the requirements of Section 7.0304.A.1 and 2.

C. Other Substandard Lots. Except for lots which meet the requirements of Subsection 7.0304.A or B, a zoning permit for the improvement of a lot having lesser dimensions than those stated in Sections 7.0302 and 7.0303 shall be issued only if a variance is granted by the Board of Adjustment.

7.0305 BOATHOUSE REGULATIONS

A. Boathouses Shall be Designed solely for the storage of boats and related equipment and shall not be used for human habitation.

B. The Construction or Placing of a boathouse waterward beyond the ordinary high water mark of any navigable water is prohibited.

- C. Boathouses Shall Not Exceed 400 square feet in floor area.
- D. The Highest Point of the Roof Elevation shall not exceed 10 feet in vertical measurement above the average elevation of the existing grade immediately adjacent to all sides of a structure. Railings may be placed on top of the boathouse in excess of the 10-foot height limitation, provided that the railing is not solid in appearance and does not exceed 3.5 feet in height.
- E. Boathouses Shall be Set Back a minimum of 10 feet from the ordinary highwater mark and shall be constructed in conformity with the floodplain requirements set forth in Section 7.0700.
- F. No Boathouse shall be constructed where the existing slope is more than 20%.

7.0306 SETBACK FROM NAVIGABLE WATERS

- A. Setback for Buildings and Structures. Except as hereinafter provided, all buildings and other structures shall be set back at least 75 feet from the ordinary high water mark of navigable waters.
 - 1. Piers, docks, wharfs, boat hoists, and boathouses are exempt from the 75-foot setback requirement under Section NR 115.05 (3) (b) 3 of the Wisconsin Administrative Code. A zoning permit is required for such structures. The zoning permit application shall include a copy of any required DNR permits, or correspondence from the DNR that no DNR permit is required.
 - 2. Stairways, walkways, lifts, trails, and trail bridges may be located within the 75-foot setback if necessary to provide pedestrian access to navigable waters or a water-dependent use, provided a zoning permit is granted by the Zoning Administrator and all other applicable requirements of this ordinance are met, including those related to vegetation removal; filling, grading, and excavating; and structures in floodplain areas. Stairways, walkways, lifts, trails, and trail bridges shall be located so as to minimize earth disturbing activities and shoreland vegetation removal during construction and to be visually inconspicuous and screened by vegetation as viewed from adjacent navigable waters and public thoroughfares. Stairways, walkways, lifts, trails, and trail bridges shall be no more than four feet wide, unless a greater width is required to meet the requirements of the Americans with Disabilities Act or the guidelines of the American Association of State Highway and Transportation Officials. Stairway landings shall be no more than 40 square feet in area.
 - 3. Transportation and utility facilities, including but not limited to streets, bridges, and transmission lines, may be located within the 75-foot setback area if it is not feasible to locate the facility outside the setback and a stipulated permit allowing a lesser setback is granted by the Zoning Administrator in accordance with Section 7.0905.
 - 4. Patios and decks are exempt from the shoreland setback requirement provided the following requirements are met:
 - (a) The patio or deck shall be located so as to minimize earth disturbing activities and shoreland vegetation removal during construction.
 - (b) The patio or deck shall be visually inconspicuous and screened by vegetation as viewed from adjacent navigable waters and public thoroughfares.
 - (c) The part of the patio or deck that is nearest to the water shall be located at least 35 feet landward from the ordinary high water mark.
 - (d) The total floor area of all structures in the shoreland setback area of the lot, including the patio or deck, shall not exceed 200 square feet. Boathouses shall be excluded from this calculation.
 - (e) The patio or deck shall have no sides or shall have open or screened sides.

- (f) The landowner shall submit a plan to the Zoning Administrator to preserve or establish a vegetative buffer area that covers at least 70 percent of the half of the shoreland setback area that is nearest to the water.
 - (g) The top surface of the floor of the patio or deck shall not exceed a height of six inches above the original grade.
 - (h) A zoning permit and approval of the vegetative buffer plan required under paragraph (f) above is required prior to construction.
5. Open Fences less than six feet in height on land used for agricultural purposes that meet the standards of Chapter 30 and Chapter 90 of the Wisconsin Statutes are exempt from the 75-foot setback requirement.
- B. Reduced Building Setbacks/Setback Averaging. A setback of less than that required by Section 7.0306.A may be permitted by the Zoning Administrator where there is at least one principal building on either side of the applicant's lot within 200 feet of the proposed site that is built to less than the required setback. In such case, the setback shall be the average of the setbacks of the nearest principal building on each side of the proposed site or, if there is an existing principal building on only one side, the setback shall be the average of the existing building's setback and the required setback. Any other setback reduction may be permitted by the Board of Adjustment pursuant to Section 7.1006 of this ordinance.

7.0307 PROTECTIVE AREAS ADJACENT TO STREAMS, LAKES, AND WETLANDS

Projects that require a stormwater management plan under Chapter 151 of the Wisconsin Administrative Code shall comply with the standards set forth in Section 151.12 (5) (d) of that code, which specify “protective areas” to be provided adjacent to streams, lakes, and wetlands.

7.0308 EROSION HAZARD SETBACK FROM BLUFFS

- A. All Buildings and Structures in the Lake Michigan bluff area shall be set back the greater of the following distances:
- 1. A distance equal to a slope ratio of 2.5 feet horizontal distance to every one foot vertical distance, measured horizontally from the toe of the bluff, calculated using the most severe angle of slope as determined by a registered professional engineer or a surveyor and approved by the Zoning Administrator, and based on the following graph (see Figure 1). Measurement of the stable slope angle setback shall be made from the toe of the bluff perpendicular to the shoreline. There shall be two such measurements for every 100 feet of shoreline at points not less than 50 feet apart. The setback shall be a line connecting these two points, or such line extended.
 - 2. A minimum setback of 75 feet from the edge of any bluff.
- B. Seepage Pits and Soil Absorption Fields in the Lake Michigan bluff area shall be set back a minimum of 75 feet from the edge of any bluff, unless a stipulated permit is granted in accordance with Section 7.0905 to allow a lesser setback.

7.0309 EROSION HAZARD SETBACK FROM RAVINES

- A. Except as set forth in Subsection B, all buildings, structures, seepage pits, and soil absorption fields shall be set back the greater of the following distances in the Lake Michigan ravine area:
- 1. A distance equal to a slope ratio of 2.5 feet horizontal distance to every one foot vertical distance measured horizontally from the toe of the ravine, calculated using the most severe angle of slope, as determined by a registered professional engineer or a surveyor and approved by the Zoning Administrator, and based on the following graph (see Figure 1).
 - 2. A minimum setback of 75 feet from the edge of any ravine.

3. When a detailed subsurface investigation report by a Wisconsin Registered Geotechnical Engineer indicates that a ravine is a stable formation, the setback shall be as recommended in the report, subject to a minimum setback of 40 feet from the edge of that particular ravine, and subject to the approval of the Board of Adjustment.
- B. Setback from Shallow Ravines. In the case of shallow ravines in the Lake Michigan ravine area, all buildings, structures, seepage pits, and soil absorption fields shall be set back a minimum of 40 feet from the edge of the angle of repose based on a slope ratio of three feet horizontal distance to every one foot vertical distance. The vertical distance of a specific site is measured from the bottom of the ravine to the horizontal level of the land adjacent to the ravine.

Figure 1

ANGLE OF SLOPE (β)

SECTION 7.0400 REMOVAL OF SHORE COVER

7.0401 PURPOSE

The purpose of vegetation removal limitations in the shoreland area is to protect natural beauty, control erosion, and reduce the flow of effluents, sedimentation, and nutrients from the shoreland to adjacent waters.

7.0402 LIMITS ON VEGETATION REMOVAL

A. In the Strip of Land 35 Feet Wide extending inland from the ordinary high water mark, the removal of trees and shrubs shall be limited as follows:

1. No more than 30 feet in each 100 feet, or the same proportion in a lot with less than 100 feet of water frontage, shall be cleared of trees and shrubs.
2. Trees and shrubs shall be preserved as far as practicable and, where removed, shall be replaced with other vegetation that is equally effective in retarding runoff, preventing erosion, and preserving natural beauty.
3. Notwithstanding the foregoing, natural vegetation shall not be removed from bluffs or ravines except as permitted by the Zoning Administrator under a stipulated permit.

B. In Shoreland Areas More than 35 Feet inland from the ordinary high water mark, cutting of trees and shrubs shall be allowed when accomplished using accepted forest management and soil conservation practices which protect water quality.

7.0403 STREETS AND PATHS

Streets and paths within 35 feet of the ordinary high water mark shall be constructed and surfaced in a manner that controls runoff, erosion, and sedimentation.

7.0404 EXCEPTIONS

The vegetation removal restriction specified in Section 7.0402 shall not apply to the removal of noxious weeds and dead, diseased, or non-native invasive vegetation, which may be removed at any time without a permit at the discretion of the landowner; to silvicultural thinning conducted based on the written recommendation of a forester; or to routine maintenance such as lawn mowing and trimming of shrubs. A list of invasive species is maintained by the DNR, and may be obtained from the DNR website or the Zoning Administrator.

SECTION 7.0500 FILLING, GRADING, LAGOONING, DREDGING, DITCHING, AND EXCAVATING

7.0501 ACTIVITIES REQUIRING A STIPULATED PERMIT

Except as provided in Sections 7.0504 and 7.0505, the following activities may be authorized under a stipulated permit provided the activity complies with the requirements of all other applicable local, State, and Federal laws, including Chapter 30 of the Wisconsin Statutes:

- A. Filling, Grading, or Excavation of any area outside the floodplain which is within 300 feet landward of the ordinary high water mark of a navigable water on which there is:
 - 1. Filling, grading, or excavation of more than 1,000 square feet on slopes of 12 percent or more.
 - 2. Filling, grading, or excavation of more than 2,000 square feet on slopes less than 12 percent.
- B. Changing, Enlarging, or removing materials from navigable waters.
- C. For any Construction or Dredging on any artificial waterway, canal, ditch, lagoon, pond, lake, or similar waterway which is within 300 feet landward of the ordinary high water mark of navigable waters or where the purpose is the ultimate connection with navigable waters.
- D. Placing of Rip-Rap along the banks of navigable waters to reduce erosion.
- E. Streambank Stabilization Projects, including but not limited to bio-engineering.
- F. Agricultural Pollution Control Projects.
- G. Grading or Excavating in the Floodplain, provided no fill is placed in the floodplain.

7.0502 PERMIT APPLICATION

An application for a stipulated permit for activities listed in Section 7.0501 shall contain the following information:

- A. Existing Site Map. A map of existing site conditions at a scale of no less than one inch equals 100 feet showing the following:
 - 1. Site boundaries that accurately identify the site location.
 - 2. Location of lakes, streams, wetlands, channels, ditches, and other waterbodies or watercourses on and within 25 feet of the site.
 - 3. The limits and elevations of the floodplain, and, where known, floodway and floodfringe boundaries.
 - 4. Location and identification of predominant soil types.
 - 5. Existing vegetative cover.
 - 6. Location and dimensions of existing stormwater drainage ditches and natural drainage patterns on and within 25 feet of the site.
 - 7. Location and dimensions of existing utilities, structures, streets, and pavement.
 - 8. Site topography with a maximum contour interval of two feet.
- B. Plan of Final Site Conditions. A plan of final site conditions at the same scale as the existing site map shall be prepared which shows the proposed changes in the site.
- C. Site Construction Plan. A site construction plan at the same scale as the existing site map shall be prepared which shows the following:
 - 1. Locations and dimensions of all proposed land disturbing activities.
 - 2. Locations and dimensions of all temporary material stockpiles.

3. Location and dimensions of proposed erosion control measures.
 4. A schedule of anticipated starting and completion dates of each land disturbing activity, including the dates of installation of erosion control measures.
 5. Provisions for maintenance of the erosion control measures during construction.
- D. For projects involving work in navigable waters, a copy of an approved Chapter 30 permit issued by the Wisconsin Department of Natural Resources (DNR) or a letter or e-mail from the DNR stating that a Chapter 30 permit is not required shall also be submitted with the application for a stipulated permit.

7.0503 GENERAL STANDARDS FOR ACTIVITIES REQUIRING A PERMIT

- A. Any Filling, Grading, Lagooning, Dredging, Ditching, or Excavating shall be done in a manner designed to minimize erosion, sedimentation, and impairment of fish and wildlife habitat.
- B. All Applicable Federal, State, and local approvals and permits must be obtained.
- C. Filling Shall Comply with all floodplain zoning requirements set forth in this ordinance and shall not restrict a floodway or destroy the flood storage capacity of a floodplain.
- D. Lagoons shall be constructed to avoid fish trap conditions.
- E. Fill Shall be Stabilized according to accepted engineering standards.
- F. Maintenance of Control Measures. All sediment basins and other erosion control measures necessary to meet the requirements of this section shall be maintained by the applicant or subsequent landowner during the period of land disturbance and land development of the site in a satisfactory manner to ensure adequate performance and to prevent nuisance conditions.
- G. Waste and Material Disposal. All waste and unused building materials, including garbage, debris, cleaning wastes, wastewater, toxic materials, or hazardous materials, shall be properly disposed of in a timely manner, and not allowed to be carried by runoff into a receiving channel or storm sewer system.
- H. Site Erosion Control. Erosion control measures shall meet the design criteria, standards, and specifications based on any of the following:
 1. Applicable design criteria, standards, and specifications identified in the Wisconsin Construction Site Best Management Practice Handbook, DNR Pub. WR-222, November 1993 revision, and subsequent amendments, available in the office of the Zoning Administrator.
 2. Other design guidance and technical standards identified or developed by the DNR under Subchapter V of Chapter NR 151 of the Wisconsin Administrative Code.

7.0504 SOIL CONSERVATION PRACTICES

Soil conservation practices such as tiled terraces, runoff diversions, and grassed waterways used for erosion control shall not require a permit under Section 7.0501 when designed and constructed to U. S. Natural Resources Conservation Service technical standards.

7.0505 AGRICULTURAL DRAINAGE MAINTENANCE AND REPAIR

The maintenance of existing agricultural drainage systems including ditching, tiling, dredging, excavating, and filling necessary to maintain the level of drainage required to continue the existing agricultural use shall not require a permit under Section 7.0501, provided the maintenance work is conducted outside a shoreland-wetland or floodplain. Filling shall be the minimum necessary for the disposal of dredged spoils adjacent to the drainage system, and dredged spoil shall be placed on existing spoil banks to the extent possible.

SECTION 7.0600 SHORELAND-WETLAND DISTRICT

7.0601 PURPOSE

This district is created to maintain safe and healthful conditions; to prevent and control water pollution by filtering or storing sediments, nutrients, heavy metals or organic compounds that would otherwise drain into navigable waters; to maintain storm and flood water storage capacity; to protect fish spawning grounds and wildlife habitat; to preserve shore cover and natural beauty; to control building sites and the placement of structures and land uses; to prohibit certain uses detrimental to the shoreland-wetland area; and to minimize adverse impacts upon wetlands when development is permitted in wetlands.

7.0602 DESIGNATION OF SHORELAND-WETLANDS ⁽¹⁰⁻¹⁾

Boundaries of the shoreland-wetland zoning district are shown on the Ozaukee County Shoreland and Floodplain Zoning Maps and are based on the 2005 Wisconsin Wetlands Inventory Maps and field delineations. All wetlands located in whole or in part within the shoreland area described in Section 7.0201 have been placed in the Shoreland-Wetland District.

7.0603 PRINCIPAL USES

The following uses shall be allowed, subject to the floodplain requirements in Section 7.0700 and all other requirements of this ordinance, the provisions of Chapters 30 and 31 of the Wisconsin Statutes, and the provisions of other applicable local, State, and Federal laws:

- A. Activities and Uses Which Do Not Require the Issuance of a Zoning Permit, but which must be carried out without any filling, flooding, draining, dredging, ditching, tiling, or excavating:
1. Hiking, fishing, trapping, hunting, swimming, and boating.
 2. The harvesting of wild crops, including but not limited to marsh hay, ferns, moss, wild rice, berries, tree fruits, and tree seeds, in a manner that is not injurious to the natural reproduction of such crops.
 3. The pasturing of livestock.
 4. The cultivation of agricultural crops.
 5. The practice of silviculture, including the planting, thinning, and harvesting of timber.
 6. The construction or maintenance of duck blinds.
- B. Uses Which Do Not Require The Issuance Of A Zoning Permit and which may include limited filling, flooding, draining, dredging, ditching, tiling, or excavating but only to the extent specifically provided below:
1. Temporary water level stabilization measures necessary to alleviate abnormally wet or dry conditions that would have an adverse impact on silvicultural activities if not corrected.
 2. The cultivation of cranberries including flooding, dike and dam construction, or ditching necessary for the growing and harvesting of cranberries.
 3. The maintenance and repair of existing agricultural drainage systems, including ditching and tiling, necessary to maintain the level of drainage required to continue the existing agricultural use.

4. The construction or maintenance of fences for the pasturing of livestock, including limited excavating and filling necessary for such construction or maintenance.
 5. The construction or maintenance of piers, docks, wharfs, or walkways built on pilings, including limited excavating and filling necessary for such construction and maintenance.
 6. The maintenance, repair, replacement, or reconstruction of existing streets, highways, and bridges, including limited excavating and filling necessary for such maintenance, repair, replacement, or reconstruction.
- C. Uses Which Require The Issuance Of A Zoning Permit under Section 7.0904 and which may include limited filling, flooding, draining, dredging, ditching, tiling, or excavating, but only to the extent specifically provided below:
1. The construction and maintenance of accessways which are necessary to conduct silvicultural activities or agricultural cultivation, provided that:
 - (a) The street cannot as a practical matter be located outside the wetland.
 - (b) The street is designed and constructed to minimize adverse impact upon the natural functions of the wetland enumerated in Subsection 7.1105.B.
 - (c) The street is designed and constructed with the minimum cross-section practical to serve the intended use.
 - (d) Street construction activities are carried out in the immediate area of the roadbed only.
 2. The construction or maintenance of nonresidential buildings, provided that:
 - (a) The building is used solely in conjunction with the raising of waterfowl, minnows, or other wetland or aquatic animals; or another use permitted in the shoreland-wetland district.
 - (b) The building cannot, as a practical matter, be located outside the wetland.
 - (c) The building is not designed for human habitation and does not exceed 500 square feet in floor area.
 - (d) Only limited filling or excavating necessary to provide structural support for the building is authorized.
 3. The establishment of public and private parks and recreation areas, natural and outdoor education areas, historic and scientific areas, wildlife refuges, bird and animal farms, fur animal farms, fish hatcheries, private wildlife habitat areas, and public boat launching ramps and attendant access drives, provided that:
 - (a) Any private development is used exclusively for the permitted use and the applicant has received a permit or license under Chapter 29 of the Wisconsin Statutes, where applicable.
 - (b) Filling or excavating necessary for the construction or maintenance of public boat launching ramps or attendant access streets is allowed only where such construction or maintenance meets the criteria in Section 7.0603C.1.(a) through (d) above.
 - (c) Ditching, excavating, dredging, or dike and dam construction in public and private parks and recreation areas, natural and outdoor education areas, historic and scientific areas, wildlife refuges, game preserves, and private wildlife habitat areas shall be allowed only for the purpose of improving wildlife habitat or to otherwise enhance wetland values.
 4. The construction or maintenance of electric, gas, telephone, water, and sewer transmission and distribution facilities, by public utilities and cooperative associations organized for the purpose of producing or furnishing heat, light, power,

or water to their members and the construction or maintenance of railroad lines provided that:

- (a) The transmission and distribution facilities and railroad lines cannot, as a practical matter, be located outside the wetland.
- (b) Such construction or maintenance is done in a manner designed to minimize flooding and other adverse impacts upon the natural functions of the wetland enumerated in Subsection 7.1105.B.

7.0604 PROHIBITED USES

Any use not listed in Section 7.0603 is prohibited, unless the wetland or portion of the wetland has been rezoned in accordance with Section 7.1100 of this ordinance.

7.0605 REZONING OF LANDS IN THE SHORELAND-WETLAND DISTRICT

All proposed rezoning of lands in the Shoreland-Wetland District shall comply with the requirements of Section 7.1100.

SECTION 7.0700 FLOODPLAIN DISTRICTS

7.0701 FLOODPLAIN AREAS TO BE REGULATED

Areas regulated by this section include all areas within the jurisdiction of this ordinance as set forth in Section 7.0201 that would be covered by the regional flood or base flood and all floodplain islands where emergency and relief routes would be inundated by the regional flood.

7.0702 DETERMINATION OF FLOODPLAIN BOUNDARIES

Discrepancies between boundaries on the official floodplain zoning map and actual field conditions shall be resolved by the Zoning Administrator using the criteria in subsections A or B below. The Zoning Administrator can rely on a boundary derived from a profile elevation to grant or deny a zoning permit, whether or not a map amendment is required. The Zoning Administrator shall be responsible for documenting actual pre-development field conditions and the basis upon which the floodplain district boundary was determined and for initiating any map amendments required under this section. Where the Zoning Administrator finds that there is a significant difference between the map and the actual field conditions, the map shall be amended using the procedures established in Section 7.1100. Disputes between the Zoning Administrator and an applicant over the floodplain district boundary shall be settled according to Section 7.1005.B and the following criteria:

- A. Where Flood Profiles Exist, the location of the district boundary shall be determined by the Zoning Administrator using the scale appearing on the map and the elevations shown on the water surface profile of the regional flood. The regional or base flood elevations shall govern if there are any discrepancies
- B. Where Flood Profiles Do Not Exist, the location of the district boundary shall be determined by the Zoning Administrator using the scale appearing on the map, visual onsite inspection, and any available information provided by the Southeastern Wisconsin Regional Planning Commission or the DNR.

7.0703 REMOVAL OF LANDS FROM THE FLOODPLAIN

Compliance with the provisions of this ordinance shall not be grounds for removing land from the floodplain, unless they are removed by filling to at least the flood protection elevation, the fill is contiguous to land lying outside the floodplain, and the map is amended pursuant to Section 7.1100. To remove flood insurance requirements, the property owner must contact FEMA to request a Letter of Map Change (LOMC).

7.0704 WATERCOURSE ALTERATIONS

Prior to any alteration or relocation of a navigable watercourse, and prior to the issuance of any zoning permit to alter or relocate a watercourse, the Zoning Administrator shall notify in writing the municipality within which the proposal is located, the DNR, and FEMA, and require the applicant to apply for all necessary state and federal permits. The flood carrying capacity of any altered or relocated watercourse shall be maintained. As soon as practicable, but not later than six months after the date of the watercourse alteration or relocation, the Zoning Administrator shall notify FEMA of the changes by submitting appropriate technical or scientific data in accordance with NFIP guidelines that shall be used to revise the FIRM, risk premium rates, and floodplain management regulations.

7.0705 DEVELOPMENT REQUIRING A CHAPTER 30 OR CHAPTER 31 PERMIT

Development which requires a permit from the DNR in accordance with Chapter 30 or 31 of the Wisconsin Statutes, such as piers, wharfs, bridges, culverts, dams, and navigational aids, may be allowed if the necessary permits are obtained and amendments to the floodway lines, water surface profiles, base flood elevations established in the FIS or other data from the officially adopted FIRM, and Ozaukee County Shoreland and Floodplain Zoning Maps are approved according to Section 7.1100.

7.0706 HYDRAULIC AND HYDROLOGIC ANALYSIS

- A. No Floodplain Development, except as provided in Subsection C below, shall:
1. Obstruct flow, defined as development which blocks the conveyance of floodwaters by itself or with other development, increasing the height of the regional flood.
 2. Increase regional flood height due to floodplain storage area lost, equal to or exceeding 0.01 foot.
- B. The Zoning Administrator shall deny permits where it is determined the proposed development will obstruct flow or increase regional flood heights by 0.01 foot or more, except as provided in Subsection C below. To assist in this determination, applicants shall provide a cross-section elevation view, perpendicular to the watercourse, showing if the proposed development will obstruct flow, or an analysis calculating the effects of the proposal on the regional flood height.
- C. Obstructions or Increases equal to or greater than 0.01 foot may only be permitted if amendments are made to the Ozaukee County Shoreland and Floodplain Zoning Maps, including floodway lines and water surface profiles, in accordance with Section 7.1100.
- D. This Section refers to obstructions or increases in base flood elevations as shown on the officially adopted FIRM and the Ozaukee County Shoreland and Floodplain Zoning Maps. Any such alterations must be reviewed and approved by FEMA and the DNR.

7.0707 ESTABLISHMENT OF DISTRICTS

The regional floodplain is hereby divided into the following three districts:

- A. The Floodway District consists of the channel of a river or stream and those portions of the floodplain adjoining the channel required to carry the regional floodwaters.
- B. The Floodfringe District consists of that portion of the floodplain between the regional flood limits and the floodway.
- C. The General Floodplain District consists of all areas that have been or may be hereafter covered by floodwaters during the regional flood, where no detailed studies have been conducted to differentiate the floodway and floodfringe portions of the floodplain.

7.0708 FLOODWAY DISTRICT

- A. Applicability. The requirements of this section apply to all areas mapped as floodway on the Ozaukee County Shoreland and Floodplain Zoning Maps as approved by FEMA and to those portions of the General Floodplain District determined to be floodway in accordance with Section 7.0710. The FIRM maps shall be used to determine the location of the floodway until such time as the Shoreland and Floodplain Zoning Maps are approved by FEMA.
- B. Standards for Development. Any development in the floodway district shall comply with Sections 7.0704, 7.0705, and 7.0706 and have a low flood damage potential.
- C. Principal Uses. The following open space uses are allowed provided the provisions of all other applicable local, state, and federal laws are met, including local zoning ordinances:

1. Agricultural uses, such as farming, outdoor plant nurseries, horticulture, viticulture, and wild crop harvesting.
 2. Drainage, including movement of flood water.
 3. Navigation.
 4. Non-structural industrial and commercial uses, such as parking and loading areas.
 5. Non-structural public and private recreational uses, such as golf courses, tennis courts, archery ranges, picnic grounds, swimming beaches, parks, wildlife and nature preserves, game farms, fish hatcheries, shooting, trap and skeet activities, hunting and fishing areas, and hiking and horseback riding trails.
- D. Conditional Uses and Uses Requiring a Stipulated Permit. The following uses may be permitted as a conditional use by the Board of Adjustment in accordance with Section 7.1007 if fill will be required for a proposed use or may be permitted by a Stipulated Permit issued by the Zoning Administrator in accordance with Section 7.0905 if no fill will be required for a proposed use:
1. An accessory structure associated with a permitted open space use or functionally dependent on a waterfront location, or a historic structure, subject to the following conditions:
 - (a) The structure is not designed for human habitation.
 - (b) The structure does not have a high flood damage potential.
 - (c) The structure is properly anchored to resist flotation, collapse, and lateral movement.
 - (d) Any portion of the structure located below the regional flood elevation must be constructed of flood resistant materials.
 - (e) The structure must be designed to allow for the automatic entry of flood waters.
 - (f) All mechanical and utility equipment must be elevated or flood proofed to or above the regional flood elevation.
 - (g) The structure shall not obstruct the flow of flood waters or cause any increase in flood levels during the occurrence of the regional flood.
 - (h) The use of the structure shall be limited to parking and/or limited storage.
 2. Functionally water-dependent uses that comply with Chapters 30 and 31 of the Wisconsin Statutes, including piers, wharfs, dams, flowage areas, culverts, navigational aids, and river crossings of transmission lines and pipelines, provided the necessary permits are obtained from the DNR and the water surface profiles and the Ozaukee County Shoreland and Floodplain Zoning Maps are amended to reflect any resulting increases in the regional flood elevation.
 3. Public utilities, streets, and bridges, provided that:
 - (a) Adequate floodproofing measures are provided to at least the flood protection elevation.
 - (b) Construction does not increase the regional flood height, unless the water surface profiles and the Ozaukee County Shoreland and Floodplain Zoning Maps are amended to reflect such changes.
 4. Extraction of sand, gravel or other materials, or fill or deposition of materials, provided that:
 - (a) No material is deposited in the navigable channel unless a permit has been issued in accordance with Chapter 30 of the Wisconsin Statutes.
 - (b) Required federal permits have been granted.
 - (c) Fill or deposited materials shall be protected against erosion by riprap, vegetative cover, sheet piling, or bulkheading.

- (d) The fill is not classified as a solid or hazardous waste material.
- 5. Public or private campgrounds, provided the campground has a low flood damage potential and meets the following requirements:
 - (a) The campground has been approved by the Department of Health and Family Services.
 - (b) A zoning permit for the campground has been issued by the Zoning Administrator.
 - (c) The character of the river system and the elevation of the campground is such that a 72-hour warning of an impending flood can be given to all campground occupants.
 - (d) There is an adequate flood warning procedure for the campground that offers the minimum notice required under this section to all persons in the campground. This procedure shall include a written agreement between the campground owner, the Ozaukee County emergency government coordinator and the chief law enforcement official which specifies the flood elevation at which evacuation shall occur, personnel responsible for monitoring flood elevations, types of warning systems to be used and the procedures for notifying at-risk parties, and the methods and personnel responsible for conducting the evacuation. The agreement shall be for no more than one calendar year, at which time the agreement shall be reviewed and updated to remain in compliance with all applicable regulations, including those of the Department of Health and Family Services.
 - (e) Only camping units are allowed.
 - (f) The camping units may not occupy any site in the campground for more than 180 consecutive days, at which time the camping unit must be removed from the floodplain for a minimum of 24 hours.
 - (g) All camping units that remain on site for more than 30 days shall be issued a limited authorization by the campground operator, a written copy of which is kept on file at the campground. Such authorization shall allow placement of a camping unit for a period not to exceed 180 days and shall ensure compliance with all the provisions of this section.
 - (h) The County shall monitor the limited authorizations issued by the campground operator to assure compliance with the terms of this section.
 - (i) The campground shall have signs clearly posted at all entrances warning of the flood hazard and the procedures for evacuation when a flood warning is issued.
 - (j) All service facilities, including but not limited to refuse collection, electrical service, natural gas lines, propane tanks, sewage systems and wells shall be properly anchored and placed at or floodproofed to the flood protection elevation.
 - (k) The campground is approved by the local government concerned.
- 6. Portable latrines that are removed prior to flooding, and public or private sewage systems and facilities associated with recreational uses and campgrounds that meet the applicable provisions of County ordinances and Chapter Comm 83 of the Wisconsin Administrative Code.
- 7. Wastewater treatment ponds and facilities permitted under Section NR 110.15 (3) (b) of the Wisconsin Administrative Code.

8. Public or private wells associated with recreational uses, provided the wells meet the requirements of County ordinances and Chapters NR 811 and NR 812 of the Wisconsin Administrative Code.
- E. Prohibited Uses
1. Uses not listed in Sections 7.0708.B or 7.0708.C.
 2. Structures designed for human habitation and structures with high flood damage potential.
 3. The storage of any materials that are buoyant, flammable, explosive, or injurious to property, water quality, or human, animal, plant, fish, or other aquatic life.
 4. Public or private onsite sewage systems and facilities, other than those listed in Section 7.0708.C.
 5. Wastewater treatment ponds and facilities, other than those listed in Section 7.0708.C.
 6. Public or private wells used to obtain water for ultimate human consumption, other than those listed in Section 7.0708.C.
 7. Public or private solid or hazardous waste disposal sites.
 8. Any sanitary sewer or water supply lines, except those to serve existing or proposed development located outside the floodway which comply with the regulations for the floodplain area occupied.
 9. Any use which is not in harmony with, or which may be detrimental to, the uses permitted in adjoining zoning districts.

7.0709 FLOODFRINGE DISTRICT

- A. Applicability. The requirements of this section apply to all areas mapped as floodfringe on the Ozaukee County Shoreland and Floodplain Zoning Maps, and to those portions of the General Floodplain District determined to be floodfringe in accordance with Section 7.0710.
- B. Standards for Development. Any development in the floodfringe district shall comply with Sections 7.0704, 7.0705, and 7.0706 and have a low flood damage potential.
- C. Principal Uses. Those principal uses permitted in the Floodway District.
- D. Conditional Uses and Uses Requiring a Stipulated Permit. The following uses may be permitted as a conditional use by the Board of Adjustment in accordance with Section 7.1007 if fill will be required for a proposed use or may be permitted by a Stipulated Permit issued by the Zoning Administrator in accordance with Section 7.0905 if no fill will be required for a proposed use:
 1. Residential, commercial, and institutional structures subject to the following requirements:
 - (a) The elevation of the lowest floor, excluding the basement or crawlspace, shall be placed on fill at or above the flood protection elevation. The fill shall be one foot or more above the regional flood elevation extending at least 15 feet beyond the limits of the structure. The DNR may authorize other floodproofing measures if the elevations of existing streets or sewer lines make compliance impractical and if the Board of Adjustment grants a variance.
 - (b) The basement or crawlspace floor may be placed at the regional flood elevation if it is floodproofed to a point at or above the flood protection elevation. No basement or crawlspace floor shall be located below the regional flood elevation.
 - (c) Contiguous dryland access meeting the requirements of Section 7.0712 shall be provided from the structure to land located outside the floodplain, except

that in developments where existing street or sewer line elevations make compliance with this requirement impractical, the Board of Adjustment may permit new development and substantial improvements where access streets are at or below the regional flood elevation, provided that the County receives written assurance from police, fire, and emergency services that rescue and relief will be provided to the structure by wheeled vehicles, considering the anticipated depth, duration, and velocity of the regional flood event; or the County or municipality concerned has a natural disaster plan approved by the Wisconsin Emergency Management agency and the DNR.

2. Industrial structures provided the structure is protected to the flood protection elevation using fill, levees, floodwalls, or floodproofing measures. All floodproofed structures shall meet the requirements of Section 7.0711 and shall be securely anchored to protect them from larger floods. Certification of floodproofing shall be made to the Zoning Administrator and shall consist of a plan or document certified by a registered professional engineer that the floodproofing measures are consistent with the flood velocities, forces, depths, and other factors associated with the regional flood.
3. Accessory structures associated with residential, commercial, institutional, or industrial uses may be allowed subject to the following requirements:
 - (a) Except as provided in paragraph b, an accessory structure which is not attached to a principal structure may be constructed with the lowest floor at or above the regional flood elevation.
 - (b) An accessory structure which is not connected to a principal structure and which is less than 600 square feet in size and valued at less than \$10,000 may be constructed with its lowest floor no more than two feet below the regional flood elevation provided that it meets all of the requirements set forth in Section 7.0708.D.1 and that it is subject to flood velocities of no more than two feet per second during the regional flood.
4. Decks and patios without walls, roofs, or any other type of enclosure that are attached to a principal building may be permitted below the regional flood elevation if they are not designed for human habitation, have a low flood damage potential, are constructed and placed to provide a minimum obstruction to flood flows, are firmly anchored to prevent them from floating away, have all service facilities, such as electrical and heating equipment, at or above the flood protection elevation, and are not used for storing buoyant, flammable, or explosive materials.
5. Materials that are buoyant, flammable, explosive, or injurious to property, water quality, or human, animal, plant, fish, or aquatic life shall be stored at or above the flood protection elevation, or floodproofed in accordance with Section 7.0711. Adequate measures shall be taken to assure that such materials will not enter the river or stream during flooding.
6. Public utilities, streets, and bridges, provided that where failure of public utilities, streets, or bridges would endanger public health or safety, or where such facilities are deemed essential, construction of and substantial improvements to such facilities may only be permitted if they are floodproofed to a point at or above the flood protection elevation. Public land access streets and nonessential utilities may be constructed at lower elevations if they withstand flood forces to the regional flood elevation.
7. Private onsite wastewater treatment systems, provided such systems are floodproofed in accordance with Section 7.0711 to a point at or above the flood protection

elevation and meet the requirements of County ordinances and Chapter Comm 83 of the Wisconsin Administrative Code.

8. Public and private wells, provided such wells are floodproofed in accordance with Section 7.0711 to a point at or above the flood protection elevation and meet the requirements of County ordinances and Chapters NR 811 and NR 812 of the Wisconsin Administrative Code.
 9. Public or private campgrounds, provided the campground has a low flood damage potential and meets the requirements set forth in subsection 7.0708D.5.
 10. Camping in a camping unit outside a campground subject to the following conditions:
 - (a) Camping is approved by the local government concerned.
 - (b) The camping unit consists of an easily movable tent or recreational vehicle.
 - (c) The camping unit shall not occupy the site for more than 180 days, or the time period imposed by the local government if the local government imposes a shorter time period.
 11. Mobile homes, manufactured homes, and recreational vehicles that remain on a site more than 180 days, subject to the following:
 - (a) The use is approved by the local government concerned.
 - (b) Owners or operators of all mobile or manufactured home parks and subdivisions shall provide adequate surface drainage to minimize flood damage, and prepare, secure approval of and file an evacuation plan, indicating vehicular access and escape routes, with the appropriate local emergency management authorities.
 - (c) In existing mobile home parks, all new homes, replacement homes on existing pads, substantially improved homes, and recreational vehicles that remain onsite more than 180 days or are unlicensed or not ready for highway use and which are placed or improved on a site located in the floodplain, shall have the elevation of the lowest floor located at or above the flood protection elevation, and the home shall be anchored so it does not float, collapse, or move laterally during a flood.
 - (d) Outside existing mobile home parks, including new mobile home parks and all mobile homes outside existing parks, all new, replacement, or substantially improved mobile and manufactured homes and recreational vehicles that remain onsite more than 180 days or are unlicensed or not ready for highway use, shall meet the requirements for residential structures set forth in Section 7.0709.C.1.
 - (e) A recreational vehicle shall be considered ready for highway use if it is on its wheels or jacking system, is attached to the site only by quick-disconnect utilities and security devices, and has no permanently attached additions.
- E. Prohibited Uses. The disposal of solid or hazardous waste is prohibited in floodfringe areas.

7.0710 GENERAL FLOODPLAIN DISTRICT

- A. Applicability. The requirements of this section shall apply to all floodplains for which regional flood data are not available, or to floodplains where regional flood data are available, but floodways have not been delineated. As adequate data becomes available, appropriate floodway and floodfringe districts shall be delineated.
- B. Determination of Floodway and Floodfringe Limits. Upon receiving an application for development within the General Floodplain District, the Zoning Administrator shall refer the applicant to the DNR. The DNR will evaluate the effects of the proposal upon flood height

and flood flows and the regional flood elevation, and determine floodway boundaries, in accordance with Section NR 116.20 (2) of the Wisconsin Administrative Code.

- C. Principal Uses. The principal uses permitted in Section 7.0708 shall apply within areas determined to be located in the floodway, and the principal uses permitted in Section 7.0709 shall apply within areas determined to be located in the floodfringe. Such determinations shall be made in accordance with Subsection 7.0710.B.

7.0711 FLOODPROOFING REQUIREMENTS

Where floodproofing by means other than filling is permitted, floodproofing measures shall be in accordance with the following:

- A. Floodproofing Measures shall be designed to:
1. Withstand the flood pressures, depths, velocities, uplift and impact forces, and other factors associated with the regional flood.
 2. Assure protection to the flood protection elevation.
 3. Anchor structures to foundations to resist flotation and lateral movement.
 4. Ensure that structural walls and floors are watertight to a point at or above the flood protection elevation, and that the interior remains completely dry during flooding without human intervention.
- B. An Application for a permit or variance proposing floodproofing shall include a plan or document stamped by a registered professional engineer or architect certifying that the floodproofing measures are adequately designed to protect the structure or development to a point at or above the flood protection elevation.
- C. Floodproofing Measures may include, but are not limited to, the following:
1. Reinforcing walls and floors to resist rupture or collapse caused by water pressure or floating debris.
 2. Adding mass or weight to structures to prevent flotation.
 3. Placing essential utilities at or above the flood protection elevation.
 4. Installing surface or subsurface drainage systems, including pumping facilities, to relieve pressure on external foundation walls and basement floors.
 5. Constructing water supply wells, and waste treatment and collection systems to prevent the infiltration of floodwaters into such systems.
 6. Installing cutoff valves on sewer lines and the elimination of gravity flow basement drains.
 7. Constructing permanent or moveable watertight bulkheads, erecting permanent watertight shutters and doors, and installing wire reinforced glass or glass block for windows.

7.0712 DRYLAND ACCESS REQUIREMENTS

Where dryland access from a structure to land located outside a floodplain is required, the applicant shall install an accessway with its surface at or above the regional flood elevation which is wide enough to accommodate wheeled rescue and relief vehicles. The accessway shall be kept clear of vegetation, other than turf grass. The Zoning Administrator may require the accessway to be surfaced with a durable surface and may require the installation of culverts and other improvements necessary to provide access for emergency vehicles.

SECTION 7.0800 NONCONFORMING USES AND STRUCTURES

7.0801 REQUIREMENTS FOR NONCONFORMING USES AND STRUCTURES LOCATED OUTSIDE THE FLOODPLAIN

The existing lawful use of any structure or property outside the floodplain that existed at the time this ordinance or an amendment thereto took effect and is not in conformity with the provisions of this ordinance, or an existing structure outside the floodplain that does not conform to the dimensional, structural, or locational standards of this ordinance, may be continued, subject to the following conditions:

- A. Discontinuance. If a nonconforming use or the use of a nonconforming structure is discontinued for 12 consecutive months, any future use of the property or structure shall conform to this ordinance.
- B. Nuisances. Uses which are nuisances shall not be permitted to continue as nonconforming uses.
- C. The Maintenance and Repair of nonconforming boathouses that extend waterward beyond the ordinary high water mark of any navigable water shall comply with the requirements of Section 30.121 of the Wisconsin Statutes.
- D. Nonconforming Uses outside the floodplain may be expanded or enlarged. Such expansions and enlargements shall conform with the structural setback requirements set forth in this ordinance, and shall not encroach further upon the required shoreland setback unless a variance is granted by the Board of Adjustment in accordance with Section 7.1006.
- E. Nonconforming Uses and Structures in the Floodplain. Nonconforming uses and structures located in the floodplain shall comply with the requirements of Section 7.0802.

7.0802 REQUIREMENTS FOR NONCONFORMING USES AND STRUCTURES LOCATED WITHIN THE FLOODPLAIN

The existing lawful use of any structure or property within the floodplain that existed at the time this ordinance or an amendment thereto took effect and is not in conformity with the provisions of this ordinance, or an existing structure within the floodplain that does not conform to the dimensional, structural, or locational standards of this ordinance, may be continued, subject to the following conditions:

- A. Requirements Applicable to Nonconforming Uses and Structures Located in a Floodplain:
 - 1. No modifications or additions to a nonconforming use or structure shall be permitted unless they comply with this ordinance. The words "modification" and "addition" include, but are not limited to, any alteration, addition, modification, structural repair, rebuilding, or replacement of any such existing use or structure other than ordinary maintenance. Ordinary maintenance does not include the repair of a damaged structure. Ordinary maintenance does include painting, decorating, paneling, and the replacement of doors, windows, and other nonstructural components and the maintenance, repair, or replacement of existing private sewage or water supply systems or connections to public utilities. The construction of a deck that does not exceed 200 square feet, has no roof or sides, has a permeable floor that allows the infiltration of precipitation, and that is adjacent to the exterior wall of a principal structure is also considered ordinary maintenance.

2. No modification or addition to any nonconforming structure or any structure with a nonconforming use, which over the life of the structure would exceed 50 percent of its present equalized assessed value, shall be allowed unless the entire structure is permanently changed to a conforming structure with a conforming use in accordance with the requirements of this ordinance. Contiguous dryland access shall be provided in compliance with Section 7.0709.D.1(c). The costs of elevating a nonconforming structure or a structure with a nonconforming use to the flood protection elevation are excluded from the 50 percent limitation.
 3. As requests are received for modifications or additions to nonconforming uses or nonconforming structures, a record shall be kept by the Zoning Administrator which lists the nonconforming uses and nonconforming structures, their present equalized assessed value, and the cost and cumulative percent over the life of the building of those additions or modifications which have been permitted. This information shall be recorded by the Zoning Administrator with the Office of the Register of Deeds, with the cost of recording to be paid by the applicant.
 4. If a nonconforming use or the use of a nonconforming structure is discontinued for 12 consecutive months, any future use of the property or structure shall conform to this ordinance.
 5. Uses which are nuisances shall not be permitted to continue as nonconforming uses.
 6. The maintenance and repair of nonconforming boathouses that extend waterward beyond the ordinary high water mark of any navigable water shall comply with the requirements of Section 30.121 of the Wisconsin Statutes.
 7. Any expansion or enlargement of nonconforming structures in the floodplain allowed under this Section shall conform with the structural setback requirements set forth in this ordinance, and shall not encroach further upon the required shoreland setback unless a variance is granted by the Board of Adjustment in accordance with Section 7.1006.
 8. If a nonconforming structure or any structure with a nonconforming use is destroyed or is substantially damaged, it cannot be replaced, reconstructed, or rebuilt unless the use and the structure meet the requirements of this ordinance, or unless subsection 7.0802.D applies. A structure is considered substantially damaged if the total cost to restore the structure to its pre-damaged condition exceeds 50 percent of the structure's present equalized assessed value.
 9. A nonconforming historic structure may be altered if the alteration will not preclude the structure's continued designation as a historic structure, the alteration will comply with Sections 7.0704, 7.0705, and 7.0706, flood resistant materials are used, the structure has a low flood damage potential, and construction practices and floodproofing methods are used that comply with Section 7.0711.
- B. Nonconforming Uses and Structures in the Floodway or General Floodplain:
1. No modification or addition shall be allowed to any nonconforming structure or any structure with a nonconforming use in a floodway or a general floodplain area, unless such modification or addition:
 - a. Has been granted a permit or variance.
 - b. Meets the requirements of Subsection 7.0802.A.
 - c. Will not increase the obstruction to flood flows or the height of the regional flood.
 - d. Is floodproofed pursuant to Section 7.0711 by means other than the use of fill to a point at or above the flood protection elevation.

2. No new private onsite sewage system, or addition to an existing private onsite sewage system, shall be allowed in a floodway area, except where an addition has been ordered by a governmental agency to correct a hazard to public health. Any replacement, repair, or maintenance of an existing sewage system in a floodway area shall meet the applicable requirements of this ordinance, the County private sewage system ordinance, and Chapter Comm 83 of the Wisconsin Administrative Code.
 3. No new well or modification to an existing well used to obtain potable water shall be allowed in a floodway area. Any replacement, repair, or maintenance of an existing well in a floodway area shall meet the applicable requirements of this ordinance, the County private sewage system ordinance, and Chapters NR 811 and NR 812 of the Wisconsin Administrative Code.
- C. Nonconforming Uses and Structures in the Floodfringe:
1. No modification or addition shall be allowed to any nonconforming structure or any structure with a nonconforming use unless such modification or addition has been granted a permit or variance. In addition, the modification or addition shall be placed on fill or floodproofed to the flood protection elevation in compliance with the standards for that particular use in Section 7.0709, except where paragraph 2 below applies.
 2. Where compliance with the provisions of paragraph 1 above would result in unnecessary hardship and only where the structure will not be used for human habitation and is not associated with a high flood damage potential, the Board of Adjustment may grant a variance, if a variance is needed, from those provisions of paragraph 1, or the Zoning Administrator may issue a Stipulated Permit, in cases where a variance is not required, for modifications or additions to a nonconforming structure, using the criteria listed below. Modifications or additions which are protected to elevations lower than the flood protection elevation may be permitted if:
 - a. No floor is allowed below the regional flood elevation for residential, commercial, and institutional buildings.
 - b. Human lives are not endangered.
 - c. Public facilities, such as water or sewer, will not be installed.
 - d. Flood depths will not exceed two feet.
 - e. Flood velocities will not exceed two feet per second.
 - f. The structure will not be used for the storage of materials that are buoyant, flammable, explosive, or injurious to property, water quality, or human, animal, plant, fish, or other aquatic life.
 3. If the requirements of paragraphs 1 or 2 above cannot be met, one addition to an existing room in a nonconforming building or a building with a nonconforming use may be allowed in the floodfringe if the addition:
 - a. Meets all other regulations and will be granted by permit or variance.
 - b. Does not exceed 60 square feet in area.
 - c. In combination with other previous modifications or additions to the building, does not exceed 50 percent of the present equalized assessed value of the building.
 4. All new private sewage systems, or an addition to, replacement, repair, or maintenance of a private sewage system shall meet the applicable provisions of this ordinance, the County private sewage system ordinance, and Chapter Comm 83 of the Wisconsin Administrative Code.
 5. All new wells, or an addition to, replacement, repair, or maintenance of an existing well, shall meet the applicable provisions of this ordinance, the County private

sewage system ordinance, and Chapters NR 811 and NR 812 of the Wisconsin Administrative Code.

D. Nonconforming Structures In A Floodplain Damaged By Certain Natural Disasters:

1. As provided by Section 87.30 (1d) of the Wisconsin Statutes, the repair or reconstruction of a nonconforming building that is damaged or destroyed by a nonflood disaster may be allowed, subject to approval of a conditional use permit, provided the repaired or reconstructed nonconforming building will meet all of the minimum requirements of the National Flood Insurance Act of 1968 (42 USC 4001 to 4129) and the regulations promulgated thereunder.
2. Repairs, improvements, and reconstruction are authorized only to the extent that they are necessary to repair the specific damage caused by the nonflood disaster. To the extent practical, repairs, improvements, and reconstruction shall result in a lesser degree of nonconformity than the conditions that existed prior to the disaster (for example, re-orienting a building so that its long axis is parallel to the direction of flood flow). Repairs, improvements, and reconstruction shall not increase the degree of nonconformity that existed prior to the disaster.

7.0803 **CHANGES AND SUBSTITUTIONS**

Once a nonconforming use or structure has been changed to conform, it shall not revert back to a nonconforming use or structure. Once the Board of Adjustment has permitted the substitution of a more conforming use for an existing nonconforming use, the substituted use shall lose its status as a legal nonconforming use and become subject to all the conditions required by the Board of Adjustment.

SECTION 7.0900 ADMINISTRATION

7.0901 ENVIRONMENT AND LAND USE COMMITTEE

The County Environment and Land Use Committee is hereby declared to be the agent of the County Board for all matters pertaining to zoning under this ordinance, except for such powers as are specifically reserved for the County Board, the County Board of Adjustment, and the Zoning Administrator. The Environment and Land Use Committee shall have the following duties and powers:

- A. To Oversee the functions of the office of the Zoning Administrator.
- B. To Review all proposed amendments to the shoreland and floodplain zoning ordinance map and text and recommend action to the County Board.
- C. To Review all proposed land divisions within the shoreland area and recommend action to the County Board.
- D. To Maintain a complete record of its proceedings.

7.0902 PUBLIC INFORMATION

To the fullest extent possible, the Environment and Land Use Committee and its staff shall make available to the public all reports and documents concerning the County Shoreland and Floodplain Zoning Ordinance. In addition:

- A. All Available Information in the form of reports, bulletins, maps, and engineering data shall be readily available.
- B. Where Useful, Marks On Bridges or buildings or other markers may be set to show the depth of inundation during the 100-year recurrence interval floodplain at appropriate locations within the floodplain.
- C. Information Regarding The Location Of Floodplains and Wetlands shall be provided to landowners, realtors, lenders, and the general public. All legal descriptions of property containing floodplains or wetlands should include information designating the floodplains or wetland areas when property is transferred.
- D. The Environment and Land Use Committee may set fees necessary to recover the costs of providing information to the public.

7.0903 ZONING ADMINISTRATOR

The County Zoning Administrator, or designees in the Ozaukee County Land and Water Management Department, is hereby designated as the administrative and enforcement officer for the provisions of this ordinance. The Zoning Administrator shall have the following duties and powers:

- A. Advise Applicants as to the provisions of this ordinance, assist them in preparing permit applications and appeal forms, and ensure that the regional flood elevation for the proposed development is shown on all permit applications, where applicable.
- B. Issue Permits and certificates of compliance and inspect properties for compliance with this ordinance.
- C. Have Access to premises and structures during reasonable hours to make those inspections deemed necessary to ensure compliance with this ordinance. If refused entry after presenting identification, the Zoning Administrator or designee may procure a special inspection warrant in accordance with Section 66.0119 of the Wisconsin Statutes.

- D. Prohibit the use of private water supply or private onsite wastewater treatment systems not in compliance with the requirements of this ordinance or the County private sewage system ordinance.
- E. Keep the Official Records of all water surface profiles, certified lowest floor and regional flood elevations, zoning maps and zoning map amendments, land division plats, nonconforming uses and structures and changes thereto, permit applications and permits issued, inspections made, work approved, appeals, variances, amendments to this ordinance, and other official actions.
- F. Investigate and report violations of this ordinance to the Environment and Land Use Committee and Corporation Counsel. Copies of the violation reports shall also be sent to the appropriate office of the Wisconsin Department of Natural Resources (DNR), where applicable.
- G. Submit the following to the appropriate office of the DNR:
 - 1. Written notice at least 10 days in advance of any hearing on a proposed variance, conditional use permit, appeal for map or text interpretation, or a map or text amendment.
 - 2. Copies of variances, conditional use permits, decisions on appeals for map or text interpretations, and map or text amendments within 10 days of the decision.
 - 3. Copies of any case-by-case analyses and an annual summary of the number and types of floodplain zoning actions taken.
 - 4. Copies of substantial damage assessments performed and related correspondence.
- H. Submit Copies of text and map amendments and biennial reports to the FEMA regional office, on request.
- I. Inspect all Damaged floodplain structures and perform a substantial damage assessment to determine if substantial damage has occurred.

7.0904 ZONING PERMIT

- A. When Required. Except where another section of this ordinance specifically exempts development from this requirement, a zoning permit shall be obtained from the Zoning Administrator:
 - 1. Before any new development is initiated.
 - 2. Before any change in the use of an existing building or structure is initiated.
 - 3. Before any building or other structure is erected, moved, or structurally altered so as to change its use or increase its floor area.
 - 4. Before any land use is substantially altered.
 - 5. Before any private sewage system or water system is constructed or structurally altered.
 - 6. Before any modification or addition is made to a nonconforming structure, or a structure with a nonconforming use.
- B. An Application for a zoning permit shall be made to the Zoning Administrator on forms furnished by the County and shall include the following information:
 - 1. Name and address of the applicant, owner of the site, architect, professional engineer, and contractor.
 - 2. Legal description of the property.
 - 3. The proposed use, and whether it is new construction or a modification.
 - 4. A site plan, drawn to scale, containing the information listed below. A certified survey map shall be submitted for new construction or major improvements if required by the Zoning Administrator.
 - (a) Location, dimensions, and area of the lot.

- (b) Location of the ordinary high water mark of any abutting navigable water.
 - (c) The location and dimensions of existing and proposed structures and impervious areas; existing and proposed easements, rights-of-way, offstreet parking, loading areas, and driveways; and existing highway access restrictions.
 - (d) The distance between any existing and proposed structures from all lot lines, and the ordinary high water mark of any abutting navigable water.
 - (e) Areas of proposed filling, grading, lagooning, or dredging and the amount of material involved.
 - (f) The proposed sewage disposal plan, if connection is not to be made to a municipal sewerage system, which shall comply with all County ordinances, Chapter Comm 83 of the Wisconsin Administrative Code, and other applicable laws and regulations.
 - (g) The proposed water supply plan, if connection is not to be made to a municipal water supply system, which shall comply with all County ordinances, Chapter NR 812 of the Wisconsin Administrative Code, and other applicable laws and regulations.
 - (h) The location of wetlands and slopes of 12 percent or greater; and primary environmental corridors, natural areas, and critical species habitat sites identified on SEWRPC inventories. The boundaries of wetlands, natural areas, and primary environmental corridors shall be determined on the basis of a field survey made to identify, delineate, and map those boundaries, and the name of the person, agency, or firm identifying, delineating, and mapping the boundaries shall be provided together with the date of the field survey. The applicant shall submit an electronic copy of the field delineations in ArcShape file format. CAD format will also be accepted, provided an adequate number of GIS points are provided to allow the delineations to be mapped on the County GIS.
5. If the application includes any property located within or adjacent to a floodplain, the following additional information shall be provided:
- (a) The location of the floodplain and floodway limits as determined from the official floodplain zoning maps.
 - (b) The elevation of the lowest floor of proposed buildings and the elevation and dimensions of any proposed fill, based on National Geodetic and Vertical Datum (NGVD).
 - (c) Data sufficient to determine the regional flood elevation in NGVD at the location of the development and to determine whether or not the requirements of Section 7.0700 are met.
 - (d) Data sufficient to determine if the proposed development will cause either an obstruction to flow or an increase in regional flood height or discharge according to Section 7.0706.
 - (e) Proposed floodproofing measures.
6. The required permit fee.
7. Any additional information required by the Zoning Administrator.
- C. A Zoning Permit shall be granted or denied in writing by the Zoning Administrator within 30 days after a complete application is accepted by the Zoning Administrator. Any permit issued in conflict with the provisions of this ordinance shall be null and void.

- D. The Zoning Permit shall expire 12 months from the date issued unless substantial work has commenced. A one-year extension may be granted by the Zoning Administrator upon request.

7.0905 STIPULATED PERMIT

- A. A Stipulated Permit shall be obtained from the Zoning Administrator for uses specified in this ordinance. The Zoning Administrator shall transmit a copy of the permit, including any stipulations attached to the permit, to the Clerk of the local unit of government within which the project is located. A copy of any required DNR permit, or correspondence that no DNR permit is required, shall also be provided to the Municipal Clerk.
- B. Application For A Stipulated Permit. To secure information upon which to base his determination, the applicant shall furnish to the Zoning Administrator the following information:
 - 1. All of the information required for an application for a zoning permit under Section 7.0904.B.
 - 2. A copy of any required permits issued by the DNR, or a copy of correspondence that no DNR permit is required for the project.
 - 3. Other pertinent information necessary to determine if the proposed use meets the requirements of this ordinance, as determined by the Zoning Administrator.
- C. The Zoning Administrator may attach stipulations to any stipulated permit to assure compliance with the purposes and requirements of this ordinance. The Zoning Administrator shall notify the DNR of the issuance of stipulated permits where applicable.

7.0906 CERTIFICATE OF COMPLIANCE

- A. A Certificate of Compliance will be issued by the Zoning Administrator upon the written request of a land owner, subject to the following:
 - 1. The certificate of compliance shall show that the structure or premises or part thereof, and the proposed use, conform to the provisions of this ordinance.
 - 2. Application for such a certificate shall be concurrent with the application for a zoning permit.
 - 3. The certificate of compliance shall be issued within 10 days after notification of the completion of the work specified in the zoning permit, if the building or premises or proposed use thereof conforms to all the provisions of this ordinance.
- B. For Development Located Within a Floodplain, no land shall be occupied or used, and no structure hereafter constructed, altered, added to, modified, rebuilt, or replaced shall be occupied until a certificate of compliance has been issued by the Zoning Administrator. The Zoning Administrator shall issue a certificate of compliance only after the applicant has submitted a certification signed by a registered professional engineer or registered land surveyor that the fill and lowest floor elevation were placed in compliance with the requirements of this ordinance. If floodproofing is required, the Zoning Administrator shall issue a certificate of compliance only after the applicant has submitted certification by a registered professional engineer or registered architect that the structure meets the requirements of Section 7.0711.
- C. The Zoning Administrator may issue a temporary certificate of compliance for part of a structure, pursuant to rules and regulations established by the County Board.
- D. Upon Request from the owner, the Zoning Administrator shall issue a certificate of compliance for any structure or premises existing at the time of the adoption of this ordinance, certifying after inspection the extent and type of use made of the structure or premises and whether or not such use conforms to the provisions of this ordinance.

7.0907 OTHER PERMITS

It is the responsibility of the permit applicant to secure all other necessary permits required by any local, state, federal, or county agency. This includes, but is not limited to, a water use permit pursuant to Chapter 30 of the Wisconsin Statutes or a wetland fill permit from the U. S. Army Corps of Engineers or DNR.

7.0908 PERMIT FEES

- A. All Persons, Firms, or Corporations performing work which by this ordinance requires the issuance of a permit, variance, or other specified review shall pay a fee to the Zoning Administrator to help defray the cost of administration, investigation, advertising, and processing. A fee shall be required for a zoning permit, written floodplain determination, shoreland development fee, stipulated permit, conditional use permit, zoning text or map amendment, a zoning appeal or variance, and plat review. The fees shall be set forth in the Ozaukee County Fee Schedule, as may be amended from time to time. Fees are nonrefundable, unless a written request is submitted within two business days of the date an application is filed.
- B. Fees Paid for Applications for variances and for conditional use permits are applicable for one hearing only. Fees are not refundable if the applicant cancels the hearing or if the request is denied. If the hearing is rescheduled at the request of the applicant, additional fees up to the full fee will be charged for actual costs incurred.

7.0909 DOUBLE FEE

A double fee shall be charged by the Zoning Administrator if work is started before a permit is applied for and issued. Such double fee shall not release the applicant from full compliance with this ordinance nor from prosecution for violation of this ordinance.

7.0910 REMEDIAL ACTION

Whenever an order of the Zoning Administrator has not been complied with within 30 days after written notice has been received by the owner, agent, or occupant of the premises by certified mail, the County Board, the Zoning Administrator, or the Corporation Counsel may institute appropriate legal action or proceedings to prohibit such owner, agent, or occupant from using such structure, land, or water.

7.0911 ENFORCEMENT AND PENALTIES

- A. Any Development, building, or structure constructed, moved, or structurally altered, or any use established after the effective date of this ordinance or predecessor ordinance in violation of the provisions of this ordinance or predecessor ordinance, by any person, firm, association, corporation, including building contractors or their agents, shall be deemed a violation. The Zoning Administrator or the Environment and Land Use Committee shall refer violations to the Corporation Counsel, who shall expeditiously prosecute violations. Any person, firm, association, or corporation who violates or refuses to comply with any of the provisions of this ordinance shall be subject to a forfeiture set forth in the Ozaukee County fee schedule. Each day that the violation exists shall constitute a separate offense. Every violation of this ordinance is a public nuisance and the creation thereof may be enjoined and the maintenance thereof may be abated pursuant to Section 59.69 (11) of the Wisconsin Statutes.
- B. Statute of Limitations
 - 1. As provided by Section 59.692 (1t) of the Wisconsin Statutes, where a building or structure outside the floodplain violates the dimensional or use standards of this

ordinance, and the violating building or structure has been in place more than 10 years before an enforcement action is initiated, such building or structure shall be treated as a legal nonconforming structure. All provisions of Section 7.0800 of this ordinance shall apply to such nonconforming buildings or structures.

2. Any landowner asserting as a defense to a charge of violating this ordinance that the alleged violation has been in place more than 10 years before enforcement action was initiated has the burden of proving that:
 - (a) The building or structure that is in violation has been in place more than 10 years before enforcement action was initiated.
 - (b) That the building or structure, and its use, if the use is nonconforming, has remained essentially unchanged for at least 10 years.
 - (c) That the use of the building or structure has been active and continual for 10 years or more. If a use was discontinued for more than 12 months, that use shall not be considered active and continual.

SECTION 7.1000 BOARD OF ADJUSTMENT

7.1001 ESTABLISHMENT

A Board of Adjustment shall be established pursuant to Section 59.694 of the Wisconsin Statutes.

7.1002 MEMBERSHIP

- A. The Chairperson of the County Board shall appoint no less than three and no more than five members to the Board of Adjustment, any number of which may be members of the County Board. The appointments shall be subject to approval by the County Board.
- B. All Members shall reside in the unincorporated area of the County and no two members shall reside in the same Town.
- C. Terms shall be for staggered 3-year periods beginning on July 1.
- D. The Chairperson shall be chosen by the members of the Board of Adjustment.
- E. Two Alternate Members shall be appointed by the County Board Chairperson pursuant to Section 59.694 (2) (am) of the Wisconsin Statutes.
- F. Vacancies shall be filled by the County Board Chairperson for the unexpired term of any member whose term becomes vacant. The appointments shall be subject to approval by the County Board.

7.1003 ORGANIZATION

- A. The Board of Adjustment shall organize and adopt rules of procedure for its own governance in accordance with the provisions of this ordinance and Section 59.694 of the Wisconsin Statutes.
- B. Meetings shall be held at the call of the Chairperson and at such other times as the Board may determine. Meetings shall be open to the public.
- C. Minutes of the proceedings and a record of all actions shall be kept by the Board, showing the vote of each member upon each question, the reasons for the Board's determination, and its finding of facts. These records shall be immediately filed in the office of the Board and shall be a public record.
- D. Quorum Requirements. If a quorum is present, the Board may take action by a majority vote of the members present.

7.1004 POWERS AND DUTIES

- A. The Board may exercise all of the powers conferred on such Boards by Section 59.694 of the Wisconsin Statutes.
- B. Appeals. The Board shall hear and decide appeals where it is alleged there is an error in any order, requirement, decision, interpretation, or determination made by the Zoning Administrator or other administrative official in the enforcement or administration of this ordinance, following a public hearing held in accordance with Section 7.1008.
- C. Variances. The Board may grant a variance from the dimensional standards of this ordinance pursuant to Section 7.1006, following a public hearing held in accordance with Section 7.1008.

- D. Conditional Use Permits. The Board shall hear and decide applications for conditional use permits pursuant to Section 7.1007, following a public hearing held in accordance with Section 7.1008.
- E. Substitutions. The Board shall hear and decide applications for substitution of less nonconforming uses for existing nonconforming uses, following a public hearing held in accordance with Section 7.1008. Whenever the Board permits such a substitution, the use may not thereafter be changed without application and approval.
- F. Assistance. The Board may request assistance from other County officers, departments, commissions, and boards.

7.1005 APPEALS TO THE BOARD

- A. Appeals to the Board of Adjustment may be made by any person aggrieved or by an officer, department, or board of the County affected by any decision of the Zoning Administrator or other administrative officer in regard to the administration and enforcement of this ordinance. Such appeal shall be filed in the office of the Zoning Administrator within 30 days of receipt of the written decision being appealed. The Zoning Administrator or other officer whose decision is in question shall promptly transmit to the Board all of the documents constituting the record concerning the matter appealed.
- B. Shoreland, Wetland, and Floodplain Boundary Disputes
 - 1. Shoreland Disputes: Whenever the Board of Adjustment is asked to interpret the location of a shoreland boundary, the Zoning Administrator shall contact the appropriate office of the Wisconsin Department of Natural Resources (DNR) for a final determination of navigability or ordinary high water mark location.
 - 2. Wetland Disputes: Whenever the Board of Adjustment is asked to interpret a Shoreland-Wetland District boundary where an apparent discrepancy exists between the Final Wetland Inventory Map, the adopted zoning map, and/or actual field conditions, the Zoning Administrator shall contact the DNR to determine if the wetland inventory map is in error. If the DNR staff concurs that the map is incorrect and that the site conditions either meet the wetland criteria or do not, the Zoning Administrator shall have the authority to immediately grant or deny a permit in accordance with this ordinance. If the DNR staff concurs that a particular area was incorrectly mapped as a wetland, the Board of Adjustment shall direct the Zoning Administrator to initiate appropriate action to rezone the property within a reasonable amount of time.
 - 3. Floodplain Disputes. The following procedure shall be used by the Board of Adjustment in hearing disputes concerning floodplain boundaries:
 - (a) If a floodplain district boundary is established by approximate or detailed floodplain studies, the flood elevations or profiles shall prevail in locating the boundary. If none exist, other evidence may be examined.
 - (b) The person contesting the location of the district boundary shall be given the opportunity to present his or her own technical evidence.
 - (c) Where it is determined that the floodplain is incorrectly mapped, the Board of Adjustment shall direct the Zoning Administrator to initiate appropriate action to rezone the property within a reasonable amount of time.
- C. Review Appeals of Permit Denials
 - 1. The Board of Adjustment shall review all data related to the appeal. This may include:
 - (a) The information submitted with the permit application.
 - (b) The recommendations of the Zoning Administrator.

- (c) The floodway or floodfringe determination data submitted in accordance with Section 7.0702.
 - (d) The flood elevation data submitted in accordance with Section 7.0706.
 - (e) Other data submitted to the Board with the appeal.
2. For appeals involving increases in the regional flood elevation the Board shall:
- (a) Uphold the denial where the Board agrees with the data showing an increase in flood elevation. Increases equal to or greater than 0.01 foot may only be allowed after the flood profile and map have been amended and all appropriate legal arrangements have been made with all adversely affected property owners.
 - (b) Grant the appeal where the Board agrees that the data properly demonstrates that the project does not cause an increase equal to or greater than 0.01 foot, provided no other reasons for denial exist.
- D. Conditions. Conditions may be attached to any zoning permit ordered or authorized by the Board to assure compliance with the purposes and requirements of this ordinance.

7.1006 VARIANCES

- A. The Board of Adjustment may grant, upon appeal, a variance from the dimensional standards of this ordinance provided an application for a variance is filed with the Zoning Administrator.
- B. An Applicant for a variance has the burden of convincingly demonstrating that:
- 1. The literal enforcement of the provisions of this ordinance will result in unnecessary hardship to the applicant.
 - 2. The hardship is due to unique property conditions not common to nearby lots or properties.
 - 3. The variance is not contrary to the public interest.
 - 4. The variance is consistent with the purposes of this ordinance set forth in Section 7.0104.
- C. Findings. No variance to the provisions of this ordinance shall be granted by the Board unless it finds that all the following facts and conditions exist and so indicates in the minutes of its proceedings:
- 1. Preservation of Intent: The variance is consistent with the purposes of this ordinance as set forth in Section 7.0104.
 - 2. Unnecessary Hardship: A literal enforcement of the ordinance will result in unnecessary hardship.
 - 3. Use Variance Prohibited: The variance will not grant, extend, or increase any use prohibited by this ordinance, or allow actions which would require an amendment to this ordinance or the zoning maps in accordance with Section 7.1100.
 - 4. Exceptional Circumstances: There are unique conditions associated with the property that not common to nearby lots or properties.
 - 5. Financial Hardship and Self-Created Hardship Not Grounds for Variance: The variance is not being granted on the basis of financial hardship, to increase the economic value of the property, or because of conditions that are self-created.
 - 6. Absence of Detriment: The variance will not damage the rights or property values of others or be contrary to the public interest, or harm those natural resources that this ordinance is intended to protect.
 - 7. Minimum Necessary: The variance granted is the minimum necessary to allow a reasonable use of the property.

8. Adequate Flood Protection: The variance shall not cause any increase in the regional flood elevation.
- D. When a Variance Within a Floodplain is granted the Board shall notify the applicant in writing that it may increase flood insurance premiums and risks to life and property. A copy of the notification shall be maintained with the variance record.
- E. Conditions. The Board may attach conditions that relate to this ordinance to any variance granted to assure that the public interest and neighboring properties are protected, and to mitigate adverse environmental impacts associated with the proposal.
- F. Recording. When a variance is granted, an appropriate record shall be made of the land use and structures permitted and the zoning permit shall be applicable solely to the structures, use, and property so described. The variance shall be recorded by the Zoning Administrator in the Office of the Register of Deeds, with the recording fee to be paid by the applicant.
- G. Notice To DNR. A copy of any decision on a variance shall be provided to the appropriate office of the DNR within 10 days after it is granted or denied, if applicable.

7.1007 **CONDITIONAL USE PERMITS**

- A. Application For A Conditional Use Permit. Any use listed as a conditional use in this ordinance shall be permitted only after an application has been submitted to the Zoning Administrator and a conditional use permit has been granted by the Board of Adjustment.
- B. To Secure Information upon which to base its determination, the applicant shall furnish the following information:
 1. All of the information required for an application for a zoning permit under Section 7.0904.B.
 2. Other pertinent information necessary to determine if the proposed use meets the requirements of this ordinance, as determined by the Board or the Zoning Administrator.
- C. Standards Applicable To All Conditional Uses. When considering a conditional use application, the Board of Adjustment shall evaluate the effect of the proposed use upon:
 1. Those natural resources that this ordinance is intended to protect, and the purposes set forth in Section 7.0104.
 2. The maintenance of safe and healthful conditions.
 3. The prevention and control of water pollution, including sedimentation.
 4. Potential for damage to adjacent properties due to altered surface water drainage.
 5. The erosion potential of the site based upon the degree and direction of slope, soil type, and vegetative cover.
 6. The location of the site with respect to existing or future access roads.
 7. The need of the proposed use for a shoreland location.
 8. The compatibility of the proposed use with uses on adjacent land.
 9. Compliance with this ordinance and with applicable town, village, and city ordinances.
 10. Compliance with the Ozaukee County Comprehensive Plan.
 11. The amount of liquid and solid wastes to be generated and the adequacy of the proposed disposal systems.
- D. Additional Requirements Applicable to Conditional Uses Within a Floodplain. When considering a conditional use application for a use within a floodplain, the following additional requirements shall apply:
 1. No fill or structures shall be permitted in the floodway other than those specifically allowed under Section 7.0708.

2. In addition to the information required by Subsection 7.1007.B, the applicant shall submit the following information:
 - (a) Two copies of an aerial photograph or a plan which shows the proposed development with respect to the floodway and floodfringe limits, the stream channel, existing development within the floodplain, proposed fill limits and elevations, building floor elevations, and floodproofing measures.
 - (b) A typical valley cross-section showing the stream channel, the floodplain adjoining each side of the channel, the cross-sectional area to be occupied by the proposed development, and all historical high water information.
 - (c) A plan view showing elevations or contours of the ground; pertinent structure, fill, or storage elevations; size, location, and layout of all proposed and existing structures on the site; location and elevations of streets, water supply, and sanitary facilities; soil types; and other pertinent information requested by the Zoning Administrator.
 - (d) A profile showing the slope of the bottom of the channel or flow line of the stream.
 - (e) Specifications for building construction and materials, flood proofing, filling, dredging, channel improvement, storage of materials, water supply, and sanitary facilities.
 - (f) If floodproofing is required, the applicant must submit certification by a registered professional engineer or registered architect that the floodproofing measures meet the requirements of Section 7.0711.
 3. For all subdivision proposals, as "subdivision" is defined in Chapter 236 of the Wisconsin Statutes, and other proposed developments exceeding five acres in area or where the estimated cost exceeds \$125,000, the applicant shall provide all of the computations which are required to show the effect of the proposal on flood heights, velocities, and floodplain storage. The Zoning Administrator may transmit this data to DNR with a request for technical assistance in evaluating the effects of the proposed project on flood heights, velocities, and floodplain storage and to determine flood protection levels. For purposes of this paragraph, the estimated cost of the proposal shall include all structural development and landscaping improvements, but shall exclude the cost of the land.
- E. Conditions Attached To Conditional Use Permits. Upon consideration of the factors listed above, the Board of Adjustment shall attach conditions to assure that the public interest and neighboring properties are protected, and to mitigate adverse environmental impacts associated with the proposal. Such conditions may include specifications for, without limitation because of specific enumeration: the type of shore cover; specific sewage disposal and water supply facilities; landscaping and planting screens; period and hours of operation; sureties; deed restrictions; location of piers, docks, wharfs, parking, and signs; and type of construction.
- F. Recording. When a conditional use permit is approved, an appropriate record shall be made of the land use and structures permitted and such permit shall be applicable solely to the structures, use, and property so described. The conditional use permit shall be recorded by the Zoning Administrator in the Office of the Register of Deeds, if recording is deemed necessary by the Board of Adjustment, with the recording fee to be paid by the applicant.
- G. Notice To DNR. A copy of any decision on a conditional use permit shall be provided to the appropriate office of the DNR within 10 days after it is granted or denied, if applicable.
- H. Violations and Revocation. Violations of any of the conditions attached to the permit shall be deemed a violation of this ordinance. Where the conditions of a conditional use permit are

violated and the violation is not corrected by the property owner, or the use authorized by a conditional use permit is discontinued, the conditional use permit may be revoked by the Board of Adjustment or Zoning Administrator.

7.1008 HEARINGS

- A. The Board of Adjustment shall fix a reasonable time for a hearing on an appeal or application. The Board shall give public notice thereof by publishing a Class 2 notice under Chapter 985 of the Wisconsin Statutes, specifying the date, time, and place of the hearing and the matters to come before the Board. Notice shall be mailed to the parties-in-interest. Written notice shall be given to the appropriate office of the DNR at least 10 days prior to hearings on proposed variances, conditional use permits, and appeals for map or text interpretations.
- B. A Decision regarding the appeal or application shall be made as soon as practical. Copies of all decisions on variances, conditional uses, and appeals for map or text interpretations shall be submitted to the appropriate office of the DNR within 10 days after they are granted or denied.
- C. Majority Rule. A majority vote of the Board of Adjustment shall be necessary to reverse any order, requirement, decision, or determination of the Zoning Administrator, to grant a conditional use permit or variance, or to decide in favor of an applicant on any other matter upon which the Board is required to approve under this ordinance.
- D. The Final Disposition of an appeal or application to the Board of Adjustment shall be in the form of a written resolution or order signed by the Chairperson of the Board. Such resolution shall state the specific facts which are the basis of the Board's determination and shall either affirm, reverse, vary, or modify the order, requirement, decision, or determination appealed, in whole or in part; dismiss the appeal for lack of jurisdiction or prosecution; or grant or deny the application.
- E. At the Public Hearing, any party may appear in person or by agent or by attorney.
- F. Withdrawal. Requests for a withdrawal of an application for a variance, permit, or substitute nonconforming use made before the date the notice of public hearing is submitted for publication and notice to the parties-in-interest is mailed may be re-submitted at any time. Requests for a withdrawal made after the notice of public hearing has been submitted or notice to the parties-in-interest has been mailed shall not be re-submitted for a period of one year following the withdrawal.
- G. Postponement. The Board of Adjustment may postpone a public hearing if it determines that it needs additional information.
- H. Resubmission. No appeal or application which has been denied shall again be considered unless the applicant can show a material change in circumstances, as determined by the Zoning Administrator.
- I. Rehearing. No rehearing of any issue shall take place except upon the affirmative vote of a majority of the members of the Board upon finding that substantial new material or new evidence is submitted which could not have been reasonably presented at the previous hearing. Requests for rehearing shall be in writing and shall state the reasons for the request and be accompanied by necessary data. A rehearing shall be subject to the same notice requirements and fees as the original hearing.

7.1009 DECISION

- A. The Board of Adjustment shall decide all appeals and applications within 30 days after the final hearing and shall transmit a signed copy of the Board's decision to the appellant or applicant, Zoning Administrator, and the DNR.
- B. Any Variance or Permit granted by the Board shall expire within 12 months unless substantial work has commenced pursuant to such grant. Variances and permits granted by the Board shall run with the life of the structure or use, provided the construction authorized by the Board is completed while the variance or permit is still valid.
- C. A One-Year Extension of a variance or permit may be granted by the Zoning Administrator prior to its expiration. The Zoning Administrator or applicant may request that the Board of Adjustment review the request for extension.

7.1010 REVIEW BY COURT OF RECORD

Any person or persons aggrieved by any decision of the Board of Adjustment may, within 30 days after the filing of the decision in the office of the Board of Adjustment, seek court review of the decision as provided in Section 59.694 (10) of the Wisconsin Statutes.

SECTION 7.1100 CHANGES AND AMENDMENTS

7.1101 AUTHORITY

Pursuant to Section 59.69 (5) (e) and Section 59.692 (2) of the Wisconsin Statutes, the County Board may amend the regulations of this ordinance or the Shoreland and Floodplain Zoning Maps.

7.1102 PROCEDURE

- A. Petition. A petition to amend this ordinance may be made by any landowner in the area to be affected by the amendment; by the governing body of any town, village, or city where this ordinance is in effect; or by any member of the County Board or Environment and Land Use Committee.
- B. Filing of Petition. One original and 10 copies of the proposed amendment shall be submitted directly to the Zoning Administrator. One copy of the petition and the notice of public hearing shall be provided to the County Supervisor of any affected district. One copy of the petition and the notice of public hearing shall be forwarded to the appropriate office of the Department of Natural Resources (DNR) not less than 10 days prior to the hearing. When the amendment involves an area within the floodplain, said notice and petition shall also be sent to the Federal Emergency Management Agency (FEMA), and the additional requirements set forth in Section 7.1104 shall be followed. When the petition involves a change in shoreland wetlands, the additional requirements set forth in Section 7.1105 shall be followed.
- C. Information Required. In addition to the information required on the petition form, the petitioner shall supply the following:
1. Ten copies of a map, accurately drawn to a scale of not less than one inch equals 100 feet, showing the location, dimensions, and area of the property to be rezoned, the location and existing use of all buildings on such property, and the principal use of all properties within 300 feet of the area proposed to be rezoned.
 2. The names and complete mailing addresses, including zip codes, of the owners of all properties within 300 feet of any part of the land included in the proposed change.
 3. The location of wetlands and slopes of 12 percent or greater; and primary environmental corridors, natural areas, and critical species habitat sites identified by SEWRPC inventories on the property to be rezoned. The boundaries of wetlands, natural areas, and primary environmental corridors shall be determined on the basis of a field survey made to identify, delineate, and map those boundaries, and the name of the person, agency, or firm identifying, delineating, and mapping the boundaries shall be provided together with the date of the field survey.
 4. For amendments to a floodplain district boundary, the information set forth in Section 7.1007.D.2 (a) through (f).
 5. Any further information which may be required by the Zoning Administrator to facilitate the making of a comprehensive report to the Environment and Land Use Committee, including a detailed description of the intended new use.
- D. Public Hearing and Required Notice. As soon as practical after receipt of a petition, the Environment and Land Use Committee shall call a public hearing thereon. The Committee shall give public notice thereof by publishing a Class 2 notice under Chapter 985 of the Wisconsin Statutes, specifying the date, time, and place of the hearing and the matters to

come before the Committee. Written notice shall be given to the parties-in-interest and to the Clerk of any town, village, or city affected by the proposed amendment at least 10 days prior to the hearing.

- E. Environment and Land Use Committee Action and Report. As soon as possible after the public hearing, the Environment and Land Use Committee shall act on such petition either approving, modifying and approving, or disapproving of the same. If its action is favorable to granting the requested change, or any modification thereof, it shall cause an ordinance to be drafted effectuating its determination and shall submit such proposed ordinance directly to the County Board with its recommendations. If the Environment and Land Use Committee, after its public hearing, shall recommend denial of the petition, it shall report its recommendation directly to the County Board with its reasons for such action. Proof of publication of the notice of the public hearing held by the Environment and Land Use Committee and proof of the giving of notice to the Clerk of any affected town, village, or city of such hearing shall be attached to either such report.
- F. County Board Action. Upon receipt of the report of the Environment and Land Use Committee, the County Board may adopt the ordinance as drafted by the Environment and Land Use Committee or with amendments, or it may deny the petition for amendment, or it may refuse to deny the petition for amendment as recommended by the Environment and Land Use Committee, in which case it shall refer the petition back to the Environment and Land Use Committee, with direction to draft an ordinance to effectuate the petition, and report the same back to the County Board, which may then adopt or reject such ordinance.
- G. Protest. If a protest against a proposed amendment is filed with the County Clerk at least 24 hours prior to the date of the meeting of the County Board at which the report of the Environment and Land Use Committee is to be considered, duly signed and acknowledged by the owners of 50 percent or more of the area proposed to be altered, or by abutting owners of over 50 percent of the total perimeter of the area to be altered included within 300 feet of the area proposed to be changed, such changes or amendments shall not be adopted except by the affirmative vote of three-fourths of the members of the County Board present and voting. Each signer of such protest shall include a description of the lands owned by the signer.
- H. Effective Date. Any amendatory ordinance adopted by the County Board shall become effective after adoption by the County Board and publication pursuant to Section 59.69 (5) (e) of the Wisconsin Statutes, except as may be modified by Subsection 7.1105.C. In the case of floodplain amendments, the amendment shall not become effective until it is reviewed and approved by the DNR and FEMA. Upon receipt of the foregoing approvals, the County Clerk shall record in the Clerk's office the date on which the ordinance takes effect and shall so notify the Clerk of the town, village, or city affected by such ordinance.

7.1103 ZONING AMENDMENTS IN ANNEXED AREAS

When any lands previously under the jurisdiction of this ordinance shall have been annexed to a village or city, and after the regulations imposed by this ordinance have ceased to be effective as provided by Section 59.692 (7) of the Wisconsin Statutes, the County Board may, on the recommendation of the Environment and Land Use Committee, adopt such amendatory ordinances as shall remove or delete such annexed lands from the Shoreland and Floodplain Zoning Maps or written descriptions without following the procedures provided in Section 59.69 (5) (e) 1 through 6 of the Wisconsin Statutes, and such amendatory ordinances shall become effective upon passage and publication. A copy of such ordinance shall be forwarded by the County Clerk to the Clerk of each town in which the lands affected were previously located, and to the affected city or village. Nothing in this paragraph shall be construed to nullify or supersede the provisions of Section 66.1031 of the Wisconsin Statutes.

7.1104 FLOODPLAIN DISTRICT AMENDMENTS

- A. The County Board may change or supplement the floodplain zoning district boundaries and the regulations contained in this ordinance in the manner provided by law. Actions which require an amendment include, but are not limited to, the following:
 - 1. Any change to a floodplain boundary shown on a Shoreland and Floodplain Zoning Map, including the floodway line or the boundary of any floodplain area.
 - 2. Correction of significant discrepancies between the water surface profiles and the floodplain boundary shown on the Shoreland and Floodplain Zoning Maps.
 - 3. Any fill in the floodplain that raises the elevation of the filled area to or above the flood protection elevation, provided the filled area is contiguous to land lying outside the floodplain.
 - 4. Any fill or floodplain encroachment that obstructs flow and increases the regional flood height by 0.01 foot or more.
 - 5. Any change to the text of this ordinance.
- B. Any Person Petitioning for a map amendment that would result in an obstruction to flow that would increase the regional flood height by 0.01 foot or more shall obtain flooding easements or make other appropriate legal arrangements with all adversely affected landowners, and shall notify affected towns, villages, and cities before the amendment can be approved by the County Board. Proof of such notification by the petitioner shall be submitted with the information required by Section 7.1102.C.
- C. For Amendments in Areas with no water surface profiles, the Environment and Land Use Committee and the County Board shall consider data submitted by the DNR, the Zoning Administrator's visual onsite inspections, and other available information.
- D. Prior FEMA Approval. All channel relocations and changes to the maps to alter floodway lines or to remove an area from the floodway or floodfringe that is based on a base flood elevation from a Flood Insurance Rate Map requires prior approval by FEMA.
- E. Notice to DNR and FEMA. Notice of action taken for amendments or rezoning in the Floodway, Floodfringe, or General Floodplain Districts shall be transmitted to DNR and FEMA regional offices within 10 days of the decision.

7.1105 SHORELAND-WETLAND DISTRICT AMENDMENTS

- A. For All Proposed text and map amendments to the shoreland-wetland provisions of this ordinance, the appropriate office of the DNR shall be provided with the following:
 - 1. A copy of every petition for a text or map amendment shall be provided within five days of the filing of such petition with the Zoning Administrator. Such petition shall include a copy of the map adopted as part of this ordinance outlining the area proposed to be removed from the shoreland-wetland district.
 - 2. A copy of the Environment and Land Use Committee's findings and recommendations on each proposed amendment within 10 days after the submission of those findings and recommendations to the County Board.
 - 3. Written notice of the County Board's decision on the proposed amendment within 10 days of the decision.
- B. A Wetland, or a portion thereof, in the shoreland-wetland district shall not be rezoned if the proposed rezoning may result in a significant adverse impact upon any of the following:
 - 1. Storm and flood water storage capacity.
 - 2. Maintenance of dry season stream flow, the discharge of groundwater to a wetland, the recharge of groundwater from a wetland to another area, or the flow of groundwater through a wetland.

3. Filtering or storage of sediments, nutrients, heavy metals, or organic compounds that would otherwise drain into navigable waters.
 4. Shoreline protection against soil erosion.
 5. Fish spawning, breeding, nursery, or feeding grounds.
 6. Wildlife habitat.
 7. Areas of special recreational, scenic, or scientific interest, including scarce wetland types.
- C. If the DNR notifies the Environment and Land Use Committee or County Board that a proposed text or map amendment to the shoreland-wetland provisions of this ordinance may have a significant adverse impact upon any of the criteria listed in Subsection B above, that amendment, if approved by the County Board, shall contain the following provision:

“This amendment shall not take effect until more than 30 days have elapsed after written notice of the County Board's approval of this amendment is mailed to the Department of Natural Resources. During that 30-day period the Department may notify the County Board that it will adopt a superseding shoreland ordinance for the County under Section 59.692 (6) of the Wisconsin Statutes. If the Department does so notify the County Board, the effect of this amendment shall be stayed until the Section 59.692 (6) adoption procedure is completed or otherwise terminated.”

SECTION 7.1200 LAND DIVISION REQUIREMENTS

7.1201 DEFINITIONS AND GENERAL PROVISIONS

- A. Any Division of land which results in a land division as defined in Section 7.1300 shall comply with the requirements of this section and Chapter 236 of the Wisconsin Statutes.
- B. Preliminary and Final Plats shall be submitted to the Land and Water Management Department for review and approval by the Environment and Land Use Committee for any land division that meets the definition of a “subdivision” set forth in Section 7.1300.
- C. A Certified Survey Map shall be submitted to the Land and Water Management Department for review and approval by the Environment and Land Use Committee for any land division that meets the definition of a “minor land division” set forth in Section 7.1300.
- D. When a Replat of a recorded subdivision or part thereof is proposed, the subdivision shall be vacated or altered according to the provisions of Sections 236.36 through 236.445 of the Wisconsin Statutes.
- E. Exclusions. In no instance shall the provisions of this section apply to:
 - 1. Transfers of interest in land by will or pursuant to court order.
 - 2. Leases for a term not to exceed 10 years, mortgages or easements.
 - 3. The sale or exchange of parcels of land between owners of adjoining property if additional lots are not thereby created and the lots resulting are not reduced below the minimum sizes required by this ordinance or other applicable laws or ordinances.

7.1202 LAND SUITABILITY

No land shall be divided which is held unsuitable for the proposed use by the Environment and Land Use Committee for reason of flooding, inadequate drainage, soil and rock formations with severe limitations for development, severe erosion potential, unfavorable topography, inadequate water supply or sewage disposal capabilities, or any other feature likely to be harmful to the health, safety, or welfare of the future residents of the proposed land division or of the County. The Environment and Land Use Committee, in applying the provisions of this section, shall in writing recite the particular facts upon which it bases its conclusion that the land is not suitable for the proposed use and afford the subdivider an opportunity to present evidence regarding such suitability at a meeting of the Committee. Thereafter, the Environment and Land Use Committee may affirm, modify, or withdraw its determination of unsuitability.

7.1203 DEDICATION OF LANDS

- A. All Land Division Layouts shall be developed in proper relation to existing and proposed streets, the topography, surface water, vegetative cover, other natural features, and the most advantageous development of adjoining areas. The Environment and Land Use Committee may require that suitable sites, not to exceed 2.5 percent of the total area of the land division, be dedicated for future public use such as parks, playgrounds, public access, and open spaces as needed by the land division, subject to acceptance thereof by the county or town. Any part of a street, drainageway or other public way which is indicated on a comprehensive plan or official map shall conform to the arrangement, width, and location indicated, and shall be offered for dedication to the County or the Town in which the land division is located.

- B. Subdivisions Abutting A Navigable lake or stream shall, according to the provisions of Section 236.16 (3) of the Wisconsin Statutes, provide access at least 60 feet wide to the low water mark so that there will be public access, which is connected to existing public streets, at least at one-half mile intervals, as measured along the lake or stream shore, except where greater intervals and wider access is agreed upon by the Environment and Land Use Committee, the Department of Natural Resources, and the director of plat review services of the Department of Administration and excluding shore areas where public parks, publicly owned open space, or streets are provided on either side of a stream. The Environment and Land Use Committee may require dedications of access points of greater width or at more frequent intervals at points designated by the Committee.
- C. Lands Lying Between the Meander Line established in accordance with Section 236.20 (2) (g) of the Wisconsin Statutes, and the water's edge, and any otherwise unplattable lands which lie between a proposed land division and the water's edge shall be included as part of lots, out-lots, or public dedications in any plat abutting a lake or stream. This requirement applies not only to lands proposed to be divided, but also to all lands under option to the subdivider or in which he or she holds any interest and which are contiguous to the lands proposed to be divided and which abut a lake or stream, as provided in Section 236.16 (4) of the Wisconsin Statutes.
- D. Lands To Be dedicated shall be shown on the final plat or certified survey map.
- E. All Proposed Dedications to Ozaukee County must be reviewed and accepted by the County Board. The County Board has complete discretion to accept or reject proposed dedications.

7.1204 IMPROVEMENTS

- A. Before Final Approval of any plat by the Chairperson of the Environment and Land Use Committee or approval of any certified survey map (CSM) for a minor land division by the Environment and Land Use Committee, the subdivider may install required street and utility improvements, or, if such improvements are not installed at the time that the final plat or CSM is submitted for approval, the subdivider shall, before recording the plat or CSM, enter into a contract with the County agreeing to install the required improvements and shall file with said contract a surety bond meeting the approval of the Corporation Counsel as a guarantee that such improvements will be completed by the subdivider or his or her subcontractors not later than one year from the date of recording of the plat or CSM, or later if specified. One week prior to the time each improvement is to be installed and upon its completion, the subdivider must notify the Land and Water Management Department so that adequate inspections can be made.
- B. Public Streets.
 - 1. A subdivider may be required to dedicate land for the improvement of public streets. Public streets shall be designed and located to take into account:
 - (a) Existing and planned streets.
 - (b) Topographic conditions, including the bearing, capacity, and erosion potential of the soil.
 - (c) Public convenience and safety, including facilitating fire protection, snowplowing, and pedestrian traffic.
 - (d) The proposed uses of land to be served.
 - (e) Anticipated traffic volumes.
 - (f) Further resubdivision possibilities.
 - 2. Public streets to be dedicated to Ozaukee County shall be of the right-of-way, roadway, and surface width specified by the County Highway Commissioner and

approved by the County Board. Other public streets shall comply with the requirements of Section 236.16 (2) of the Wisconsin Statutes.

3. Construction of public streets shall comply with local street standards and specifications. Where there are no local street standards, the minimum standards of the Ozaukee County Highway Department shall apply.
 4. No person shall sell any parcel of land of five acres or less in size, located outside the corporate limits of a municipality, if it abuts on a street which has not been accepted as a public street, unless the seller informs the purchaser in writing of the fact that the street is not a public street and is not required to be maintained by the Town or County.
- C. Water Supply and Public Sewerage Facilities. Where there is an existing public water supply system or public sewerage system in or near the proposed land division, the Environment and Land Use Committee shall consult with the affected local governments to determine the feasibility of providing water and/or sewer service to the land division and the requirements to be followed by the subdivider in connecting to the system. If it is not feasible to extend water and/or sewer service to the land division, or the Committee determines that such connection is not necessary, individual water supply and sewage treatment systems may be permitted by the Committee in accordance with the minimum standards and regulations of Ozaukee County and the DNR.
- D. Survey Monuments. The subdivider shall install survey monuments in accordance with the requirements of Section 236.15 of the Wisconsin Statutes.
- E. Stormwater Management. Stormwater management facilities, where needed, shall be designed to permit the unimpeded flow of natural watercourses; ensure the drainage of all points along the street line and provide positive drainage away from onsite sewage disposal facilities. In designing stormwater management facilities, special consideration shall be given to protection against shoreland erosion and siltation of surface waters and preventing excess runoff on adjacent property. The Environment and Land Use Committee may require that easements or drainage ways of widths sufficient to accommodate anticipated stormwater runoff be provided.
- F. Sanitary Sewerage.
1. In areas that have a public sanitary sewerage system in or near the proposed land division, the local municipality furnishing such service and the Environment and Land Use Committee shall determine the feasibility of providing service to the land division and, if feasible to join, the procedures to be followed by the subdivider in joining the system.
 2. The Environment and Land Use Committee may prohibit the installation of sewage disposal facilities requiring soil absorption systems, where such systems would impair water quality, and the Committee may, with approval of the Departments of Commerce and Natural Resources, allow alternative methods of waste treatment and disposal, including, but not limited to, package treatment plants or incinerator or chemical toilets.
 3. In areas that are not to be served by public sewerage systems, onsite sewage disposal systems utilizing soil absorption fields will be permitted only where soil tests indicate the systems will function adequately. Disposal systems shall be constructed to meet the requirements of Chapters Comm 82 and 83 of the Wisconsin Administrative Code and other applicable State, County, and local ordinances.
 4. Lot area, width, and area free of limiting conditions based on percolation characteristics shall meet the requirements of Chapter Comm 83 of the Wisconsin Administrative Code.

7.1205 PRE-APPLICATION CONFERENCE

- A. Prior To Filing An Application for the approval of a preliminary plat, the subdivider shall consult with the Land and Water Management Department to present his or her proposed plat for informal review. As a part of this consultation the subdivider shall submit a sketch of sufficient scale and reasonable accuracy indicating the following information.
1. The boundaries of the property being considered for division.
 2. Uses of land adjacent to the proposed land division, proposed roads, easements, public access to navigable water, dedications, community facilities, and utilities.
 3. General lot layout showing proposed lot widths and depths.
 4. General soil conditions, seasonally wet areas, rock outcrops, areas with slopes over 12 percent, and areas within a primary environmental corridor.
 5. Proposed areas of filling, grading, lagooning, and dredging.
 6. Preliminary location of wetlands, floodplains, waterbodies and streams, navigable waters, and the ordinary high water mark (OHWM) of navigable waters.
 7. A description of all property owned or controlled by the subdivider contiguous to the proposed plat even though only a part of the area is proposed for immediate development.
- B. At The Pre-Application Conference, or within 30 days thereafter, County staff will inform the subdivider of any additions, changes, or corrections to the proposed plat necessary to expedite the review and approval of the preliminary and final plats.

7.1206 PRELIMINARY PLAT

- A. The Subdivider Shall Submit sufficient copies of the preliminary plat to the Land and Water management Department so that two copies can be provided by the Department to the agencies having authority to approve and object to plats under the provisions of Sections 236.10 and 236.12 of the Wisconsin Statutes.
- B. The Preliminary Plat, based upon an exterior boundary survey by a registered land surveyor, shall include:
1. Lot width and depths.
 2. Existing and proposed streets, parks, public access, community facilities, utilities, and easements.
 3. The location of wetlands, floodplain and floodway limits, the regional flood elevation, waterbodies and streams, navigable waters, the ordinary high water mark (OHWM) of navigable waters, slopes of 12 percent or greater, primary environmental corridors, natural areas, and critical species habitat sites. The boundaries of wetlands, natural areas, and primary environmental corridors shall be determined on the basis of a field survey made to identify, delineate, and map those boundaries, and the name of the person, agency, or firm identifying, delineating, and mapping the boundaries shall be provided together with the date of the field survey.
 4. An erosion control plan to include:
 - (a) A two foot interval contour map showing land characteristics such as seasonally wet areas and bedrock and proposed areas of filling, grading, lagooning, and dredging.
 - (b) Street information, including grades, cross-sections, and profiles of ditches; areas that require special attention due to soils; and proposed culvert sizes.
 - (c) Drainage patterns; the location and effects of water entering and leaving the proposed land division; the size of the watershed for each drainage area included in whole or in part within the proposed land division; the design

discharge, in cubic feet per second, for streets and drainage ditches; and the location of existing subsurface tiles and plans to reroute or destroy them.

- (d) Erosion control measures, including proposals for temporary seeding or cover, including proposed plant species, dates, rates, netting, topsoil replacement; planned erosion control structures and silt traps; and plans to protect existing natural vegetation. The standards and specifications set forth in Section 7.0503 shall be used as a guide in preparing an erosion control plan.
- C. The Proposed Layout shall be shown on a map at a scale of one inch equals 100 feet and shall identify the improvements, grading, paving, installation of facilities including, if applicable, preplanned sites for waste disposal facilities and dedications of land which the subdivider proposes to make and shall indicate when the improvements will be provided. Any proposed restrictive covenants for the land involved shall be stated.
- D. The Environment and Land Use Committee shall approve, approve conditionally, or reject the preliminary plat within 90 days, as provided by Section 236.11 of the Wisconsin Statutes, unless a longer period of time is agreed upon by the Committee and the subdivider. Failure of the Environment and Land Use Committee to act within 90 days shall constitute an approval of the preliminary plat, unless the review period is extended by mutual agreement.
- E. Notice of the Meeting at which the Environment and Land Use Committee is scheduled to review the preliminary plat shall be mailed at least 10 days prior to the meeting to the Clerk of the local government concerned and to the owners of all adjacent lots. For purposes of this section, adjacent lots are those that share all or part of a common lot line with the proposed plat, including lots that are abutting solely at corner points, and lots separated from the proposed plat by a street.

7.1207 FINAL PLAT

- A. The Subdivider Shall Submit sufficient copies of the final plat to the Land and Water Management Department so that two copies can be provided by the Department to the agencies having authority to approve and object to plats under the provisions of Sections 236.10 and 236.12 of the Wisconsin Statutes. The final plat shall be submitted within 12 months of the date of preliminary plat approval, unless the time period is extended by the Environment and Land Use Committee. The Committee may extend the time period for submittal up to 24 months from the date the preliminary plat was approved.
- B. The Final Plat Shall Conform to the preliminary plat as approved and to the requirements of all applicable ordinances and State laws. The final plat shall be accompanied by detailed construction plans of all improvements to be provided by the subdivider.
- C. Final Plats shall be submitted for review and approval by the Chairperson of the Environment and Land Use Committee. Failure of the Chairperson to act within 60 days of submittal shall constitute an approval of the final plat, unless the review period is extended by mutual agreement.
- D. A Digital File of the Final Plat shall be provided to Ozaukee County in ArcShape file format. CAD format will also be accepted, provided an adequate number of GIS points are provided to allow the delineations to be mapped on the County GIS.
- E. Approved Final Plats shall be recorded in accordance with the requirements of Section 236.25 of the Wisconsin Statutes before any lots are sold.

7.1208 CERTIFIED SURVEY MAP

- A. For A Proposed Minor Land Division, the subdivider shall submit 10 copies of a certified survey map to the Land and Water Management Department for review by County staff and the Environment and Land Use Committee.
- B. A Pre-Application Staff Conference similar to the consultation required for plats by Section 7.1205 is recommended.
- C. The Map Shall Include the information required for preliminary plats by Subsection 7.1206.B.1, 2, 3, and 4 and Subsection 7.1206.C.
- D. The Land and Water Management Department shall review the map for conformance to this ordinance and all other ordinances, rules, regulations, and comprehensive plans and components thereof as may be applicable.
- E. The Environment and Land Use Committee shall approve, approve conditionally and thereby require resubmission of a corrected map, or reject such map within 60 days from the date of filing of the map unless the time is extended by agreement with the subdivider. If the map is rejected, the reason shall be stated in the minutes of the meeting and a written statement forwarded to the subdivider. If the map is approved, the Committee Chairperson shall so certify on the face of the original map.
- F. A Digital File of the Approved CSM shall be provided to Ozaukee County in ArcShape file format. CAD format will also be accepted, provided an adequate number of GIS points are provided to allow the delineations to be mapped on the County GIS.
- G. Recordation. After the certified survey map has been approved by the Committee; the County Clerk shall cause the certification inscribed upon the map attesting to such approval to be duly executed and the map returned to the subdivider for recording with the Register of Deeds. The Register of Deeds shall not record the map unless it is offered for recording within 30 days after the date of the last approval and within 12 months after the first approval.

7.1209 REVIEW CRITERIA

In accordance with Section NR 115.05 (4) of the Wisconsin Administrative Code, the Environment and Land Use Committee shall consider the following factors in its review of proposed land divisions:

- A. Hazards to the health, safety, or welfare of future residents of the land division.
- B. Proper Relationship to adjoining areas.
- C. Public Access to navigable waters in accordance with Section 236.16 (3) of the Wisconsin Statutes.
- D. Adequate Stormwater Management facilities.
- E. Conformity to Federal, State, and local laws and ordinances.

7.1210 REPLATS

When it is proposed to replat a recorded subdivision, or part thereof, so as to change the boundaries of a recorded subdivision, or part thereof, the subdivider or person wishing to replat shall vacate or alter the recorded plat as provided in Sections 236.36 through 236.445 of the Wisconsin Statutes. The subdivider, or person wishing to replat, shall then proceed as specified in Sections 7.1205, 7.1206, and 7.1207.

7.1211 APPEALS

Any person aggrieved by an objection to a plat or a failure to approve a plat may appeal such objection or failure to approve, as provided in Sections 236.13 (5) and 62.23 (7)(e) of the Wisconsin Statutes, within 30 days of notification of the rejection of the plat. Where failure to approve is based on an unsatisfied objection, the agency making the objection shall be made a party to the action. The court shall direct that the plat be approved if it finds that the action of the approving or objecting agency is arbitrary, unreasonable, or discriminatory.

SECTION 7.1300 DEFINITIONS

7.1301 GENERAL DEFINITIONS

For the purpose of this ordinance, the definitions listed in this section shall be used unless otherwise specified. Words used in the present tense include the future; the singular number includes the plural number; and the plural number includes the singular number. The word “shall” is mandatory. Words not defined in shall be construed according to any applicable definition set forth in either the State Statutes, Administrative Code, or County ordinances or in lieu thereof, shall be construed according to accepted land use, scientific, or architectural definition or in lieu thereof, according to their customary dictionary definition.

7.1302 SPECIFIC WORDS AND PHRASES

A-Zones. Those areas shown on FEMA Flood Hazard Boundary Maps which would be inundated by the regional flood. Because detailed hydraulic analyses are not performed for such areas, no base flood elevations or depths are shown within this zone.

Access. A means of approaching or entering a property.

Accessway. Any driveway, street, or other means of providing for the movement of vehicles to or from the public street system.

Accessory Use or Structure. A use or detached structure that is subordinate in purpose to the principal use of a structure, land, or water; contributes to the comfort, convenience, or necessity of the principal use; and is located on the same lot as the principal use or structure.

Agricultural Practice. Beekeeping, commercial feedlots, dairying, egg production, floriculture, fish or fur farming, grazing, livestock raising, orchards, poultry raising, raising of grain, grass, mint and seed crops, raising of fruits, nuts, and berries, sod farming, vegetable raising, placing land in federal programs in return for payments in kind, or owning land at least 35 acres of which is enrolled in the Conservation Reserve Program under 16 USC 3831 to 3836.

Approving Authorities. Each governmental body having authority to approve or reject a preliminary or final plat. Approving authorities are set forth in Section 236.10 of the Wisconsin Statutes.

Base Flood. A flood having a one percent chance of being equaled or exceeded in any given year, as published by the Federal Emergency Management Agency (FEMA) as part of a Flood Insurance Study (FIS) and depicted on a Flood Insurance Rate Map (FIRM). (See also “Regional Flood”).

Base Flood Elevation. An elevation equal to that which reflects the height of the base flood.

Basement. Any enclosed area of a building that has its floor below ground level on all sides.

Bluff. A landform whose upper elevation is at least 20 vertical feet above the toe of the slope and which has a slope equal to or exceeding 34 degrees.

Bluff Recession Rate. The rate at which a bluff recedes because of erosion by the waters of Lake Michigan and because of unstable slope conditions.

Boathouse. A permanent structure designed solely for the purpose of protecting or storing boats and related equipment for noncommercial purposes.

Building. Any structure having a roof supported by columns or walls for the housing or enclosure of an individual, animal, process, equipment, goods, or materials of any kind.

Bulkhead Line. A geographic line along a reach of navigable water that has been adopted by a County or municipal ordinance and approved by the Department of Natural Resources pursuant to Section 30.11 of the Wisconsin Statutes. Limited filling and development may be permitted only between the bulkhead line and the original ordinary high water mark. Such filling may, however, be prohibited by the floodway provisions of this ordinance.

Campground. Any parcel of land which is designed, maintained, intended or used for the purpose of providing sites for nonpermanent overnight use by four or more camping units, or which is advertised or represented as a camping area.

Camping Unit. Any portable device, no more than 400 square feet in area, used as a temporary shelter, including but not limited to a camping trailer, motor home, bus, van, pick-up truck, tent or other mobile recreational vehicle.

Certificate of Compliance. A certification issued by the Zoning Administrator stating that the construction and the use of land or a building, the elevation of fill, or the lowest floor of a structure, is in compliance with all of the provisions of this ordinance.

Certified Survey Map. A map, prepared in accordance with Section 236.34 of the Wisconsin Statutes and this ordinance, for the purpose of creating a minor land division; or used to document for recording purposes survey and/or dedication data relating to single parcels.

Channel. A natural or artificial watercourse with definite bed and banks to confine and conduct the normal flow of water.

Comprehensive Plan. The extensively developed plan, also called a county development plan, adopted by the County Board pursuant to Section 59.69 (3) of the Wisconsin Statutes, or a Comprehensive Plan adopted by the County Board pursuant to Section 66.1001 of the Wisconsin Statutes. Devices for the implementation of such plans include zoning, official mapping, and land division ordinances.

Conditional Use. A use that is permitted by this ordinance provided that certain conditions specified in the ordinance are met and that a permit is granted by the Board of Adjustment.

Crawlspace. An enclosed area below the first usable floor of a building, generally less than five feet in height, used for limited access to plumbing and electrical utilities.

Dam. Any artificial barrier, together with appurtenant works, built across a waterway and which has the primary purpose of impounding or diverting water.

Development. Any artificial change to improved or unimproved real estate, including, but not limited to, the construction of buildings or structures; the construction of additions or alterations to buildings or structures; the repair of any damaged structure or the improvement or renovation of any structure, regardless of percentage of damage or improvement; the placement of buildings or structures; land division layout and site preparation; mining, dredging, filling, grading, paving, excavation or drilling operations; the storage, deposition or extraction of materials or equipment; and the installation, repair or removal of public or private sewage disposal systems or water supply facilities.

DNR. The Wisconsin Department of Natural Resources.

Dock. The space between two piers or wharfs.

Drainage System. One or more artificial ditches, tile drains, or similar devices which collect surface runoff or groundwater and convey it to a point of discharge.

Dryland Access. A vehicular access route which is above the regional flood elevation and which connects land located in the floodplain to land outside the floodplain.

Dwelling. A building designed or used exclusively as a residence or sleeping place, except for boarding houses, motels, hotels, tents, cabins, and mobile homes.

Dwelling, Single-Family. A detached building containing one dwelling unit, designed for or occupied exclusively by one family.

Elevation, Crawlspace. The elevation of the top of the floor serving the crawlspace. The floor surface may be finished or unfinished.

Elevation, Flood Protection. An elevation of two feet of freeboard above the water surface profile elevation designated for the regional flood.

Elevation, Floor. The elevation of the top surface of the lowest level of floor serving the indicated story level in the structure.

Encroachment. Any obstruction or illegal or unauthorized intrusion into a floodway, right-of-way, required setback, or onto adjacent land.

Environment and Land Use Committee. That committee created and designated by the County Board under Section 59.69 of the Wisconsin Statutes to act in all matters pertaining to County planning and zoning.

Erosion. The detachment and movement of soil, sediment, or rock fragments by water, wind, ice, gravity, or wave action.

Existing Manufactured Home Park or Subdivision. A parcel of land, divided into two or more manufactured home lots for rent or sale, on which the construction of facilities for servicing the lots is completed before the effective date of this ordinance. At a minimum, this would include the installation of utilities, the construction of streets and either final site grading or the pouring of concrete pads.

Expansion of Existing Mobile/Manufactured Home Park. The preparation of additional sites by the construction of facilities for servicing the lots on which the manufactured homes are to be affixed. This includes installation of utilities, construction of streets, and either final site grading or the pouring of concrete pads.

Federal Emergency Management Agency (FEMA). The federal agency that administers the National Flood Insurance Program. FEMA was previously known as the Federal Insurance Administration (FIA).

Fence. A structure for enclosure or screening.

Fence, Open. A structure of rails, planks, stakes, strung wire, or similar material erected as an enclosure, barrier, or boundary. Open fences are those with more than 50 percent of their surface area open for the free passage of light and air. Examples of such fences include barbed wire, chain link, picket, and rail fences.

Final Plat. A map prepared in accordance with the requirements of Chapter 236 of the Wisconsin Statutes and this ordinance for the purpose of creating a subdivision.

FIRM. See “Flood Insurance Rate Map.”

Flood or Flooding. A general and temporary condition of partial or complete inundation of normally dry land areas caused by the overflow or rise of inland waters; the rapid accumulation or runoff of surface waters from any source; the inundation caused by waves or currents of water exceeding anticipated cyclical levels along the shore of Lake Michigan; or the sudden increase caused by an unusually high water level in a natural body of water, accompanied by a severe storm, or by an unanticipated force of nature, such as a seiche, or by some similarly unusual event.

Flood Frequency. The probability of a flood occurrence, generally determined from statistical analyses. The frequency of a particular flood event is usually expressed as occurring, on the average, once in a specified number of years or as a percent chance of occurring in any given year.

Floodfringe. That portion of the floodplain outside the floodway which is covered by floodwaters during the regional flood. The floodfringe is generally associated with standing water rather than flowing water.

Flood Hazard Boundary Map. A map prepared by FEMA designating approximate flood hazard areas. Flood hazard areas are designated as unnumbered A-Zones and do not contain floodway lines or regional flood elevations. Flood hazard boundary maps form the basis for both the regulatory and

insurance aspects of the National Flood Insurance Program until superseded by a Flood Insurance Study and a Flood Insurance Rate Map.

Flood Insurance Rate Map (FIRM). A map of a community on which the Federal Insurance Administration has delineated both special flood hazard areas (the floodplain) and the risk premium zones applicable to the community. This map can be amended only by the Federal Emergency Management Agency.

Flood Insurance Study. A technical engineering examination, evaluation, and determination of local flood hazard areas. It provides maps designating those areas affected by the regional flood and provides both flood insurance rate zones and regional flood elevations and may provide floodway lines. The flood hazard areas are designated as numbered and unnumbered A-Zones. Flood insurance study maps form the basis for both the regulatory and the insurance aspects of the National Flood Insurance Program. A Flood Insurance Study for Ozaukee County was published by the Federal Emergency Management Agency on March 18, 1991.

Floodplain. Land which has been or may be covered by floodwaters during the regional flood. It includes the floodway and the floodfringe, and may include other designated floodplain areas for regulatory purposes.

Floodplain Island. A natural geologic land formation within the floodplain that is surrounded, but not covered, by floodwater during the regional flood.

Floodplain Management. Policy and procedures intended to ensure wise use of floodplains, including mapping and engineering, mitigation, education, and administration and enforcement of floodplain regulations.

Flood Profile. A graph or a longitudinal profile line showing the relationship of the water surface elevation of a flood event to land surface elevations and cultural features along a stream or river.

Floodproofing. Any combination of measures, including structural changes or adjustments, to properties and structures, water and sanitary facilities, and the contents of buildings subject to flooding for the purpose of reducing or eliminating flood damage. Floodproofing measures include sealing, anchoring, elevating, and filling.

Flood Protection Elevation. See “Elevation, Flood Protection.”

Flood Storage. Those floodplain areas where storage of floodwaters has been taken into account during analysis in reducing the regional flood discharge.

Floodway. The channel of a river or stream and those portions of the floodplain adjoining the channel required to carry the regional flood discharge.

Floor Area. The sum of the horizontal areas of each floor of a building, measured from the interior faces of the exterior walls or from the centerline of walls separating two buildings. The floor area measurement excludes the area within basements, utility rooms, garages, porches, breezeways, and unfinished attics.

Frontage, Water. The smallest dimension of a lot abutting a waterbody or watercourse, measured along the ordinary high water mark.

Freeboard. A flood protection elevation requirement designed as a safety factor, which is usually expressed in terms of a specified number of feet above a calculated flood level. Freeboard compensates for the effects of many factors that contribute to flood heights greater than those calculated, such as ice jams, debris accumulation, wave action, obstruction of bridge openings and floodways, the effects of urbanization on the hydrology of the watershed, loss of flood storage areas due to development, and aggradation of the river or stream bed.

Habitable Building. Any building, or portion thereof, used for human habitation.

Hearing Notice. Publication or posting meeting the requirements of Chapter 985 of the Wisconsin Statutes. For appeals, a Class 1 notice, published once at least one week (7 days) before the hearing, is required. For all zoning ordinance amendments, a Class 2 notice, published twice, once each week consecutively, the last at least one week (7 days) before the hearing.

High Flood Damage Potential. Potential damage that could result from flooding that includes any danger to life or health or any significant economic loss to a structure or building and its contents.

Historic Structure. Any structure that is: 1) Listed individually in the National Register of Historic Places or preliminarily determined by the Secretary of the Interior as meeting the requirements for individual listing on the National Register; 2) Certified or preliminarily determined by the Secretary of the Interior as contributing to the historical significance of a registered historic district or a district preliminarily determined by the Secretary to qualify as a registered historic district; 3) Individually listed on a state inventory of historic places in states with historic preservation programs which have been approved by the Secretary of the Interior; or 4) Individually listed on a local inventory of historic places in communities with historic preservation programs that have been certified by the State of Wisconsin.

Impervious Area. Any artificial or natural surface which does not allow the passage or entrance of water or sediment into the ground surface. Impervious surfaces include, but are not limited to, buildings, structures, concrete or asphalt surfaces, gravel or traffic bond surfaces, decks with no spaces between the decking, and bricks with no spaces between them.

Increase in Regional Flood Height. A calculated upward rise in the regional flood elevation, equal to or greater than 0.01 foot, based on a comparison of existing conditions and proposed conditions which is directly attributable to development in the floodplain but not attributable to manipulation of mathematical variables such as roughness factors, expansion and contraction coefficients, and discharge.

Lagoon. An artificial enlargement of a waterway.

Lake Michigan Ravine Area. All ravines that open directly onto a bluff located along the Lake Michigan shoreline.

Land Disturbing Activity. Any human-made alteration of the land surface resulting in a change in topography, existing vegetation, or non-vegetative soil cover. Land disturbing activity includes

filling and grading activities, the clearing and grubbing of vegetation, building foundation demolition, excavating, and pit trench dewatering.

Land Division. A division of a lot, parcel, or tract of land by the owner thereof or the owner's agent for the purpose of transfer of ownership or building development, where the act of division creates three or more parcels or building sites, inclusive of the original remnant parcel, any one of which is five acres or less by division or successive division within a five-year period.

Land Use. Any use made of unimproved or improved real estate.

Letter of Map Change (LOMC). An official notification from the Federal Emergency Management Agency that a flood hazard boundary map or flood insurance rate map has been changed. A LOMC in a general term that includes a Letter of Map Amendment (LOMA), a Letter of Map Revision (LOMR), and a Letter of Map Amendment Based on Fill (LOMR-F).

Local Unit of Government. A town, village, or city.

Lot. A parcel of land having frontage on a public street or other officially approved means of access, occupied or intended to be occupied by a principal structure or use and sufficient in size to meet lot width, lot frontage, lot area, setback, yard, parking, and other requirements of this ordinance and any applicable town, village, or city ordinances.

Lot Area. The area of a horizontal plane bounded by the front, side, and rear lot lines, excluding any street rights-of-way.

Lot Width, Average. The average of the following two measurements: 1) the width of a lot measured at the minimum setback from the street required by the applicable municipal zoning ordinance and 2) the width of a lot measured at the ordinary high water mark of a navigable waterbody or stream.

Manufactured Home. A structure transportable in one or more sections, which is built on a permanent chassis and is designed to be used with or without a permanent foundation when connected to required utilities. The term "manufactured home" includes a mobile home but does not include a "mobile recreational vehicle."

Minor Land Division. A minor land division is any division of land that creates three or more parcels or building sites, inclusive of the original remnant parcel, any one of which is five acres or less by division or successive division within a five-year period, and the division does not result in a subdivision as hereinafter defined.

Mobile Recreational Vehicle. A vehicle which is built on a single chassis, 400 square feet or less when measured at the largest horizontal projection, designed to be self-propelled, carried or permanently towable by a licensed, light-duty vehicle, is licensed for highway use if registration is required and is designed primarily not for use as a permanent dwelling, but as temporary living quarters for recreational, camping, travel, or seasonal use. Manufactured homes that are towed or carried onto a parcel of land, but do not remain capable of being towed or carried, including park model homes, do not fall within the definition of a "mobile recreational vehicle."

Municipality or Municipal. A city, town, or village.

NGVD (National Geodetic Vertical Datum). Elevations referenced to mean sea level datum, 1929 adjustment.

Navigable Waters. Lake Michigan, all natural inland lakes within Ozaukee County, and all rivers, streams, ponds, sloughs, flowages, and other waters within the jurisdictional limits of Ozaukee County which are navigable under the laws of the State of Wisconsin. The Wisconsin Supreme Court has declared navigable all bodies of water with a bed differentiated from adjacent uplands and with levels of flow sufficient to support navigation by a recreational craft of the shallowest draft on an annually recurring basis. The Wisconsin Department of Natural Resources is responsible for determining if a waterbody or watercourse is navigable.

New Construction. For floodplain management purposes, "new construction" means structures for which the start of construction commenced on or after the effective date of floodplain zoning regulations adopted by Ozaukee County and includes any subsequent improvements to such structures. For the purpose of determining flood insurance rates, it includes any structures for which the "start of construction" commenced on or after the effective date of an initial FIRM or after December 31, 1974, whichever is later, and includes any subsequent improvements to such structures.

Nonconforming Structure. A building or structure lawfully existing at the time of adoption of this ordinance which houses a use which is permitted by this ordinance, but does not comply with dimensional or structural requirements. (For example, an existing residential structure in the floodfringe is a conforming use. However, if the first floor is lower than the flood protection elevation, the structure is nonconforming.)

Nonconforming Use. Any use of land, or land and buildings in combination, lawfully existing at the time of adoption of this ordinance, which does not comply with the use regulations set forth in the ordinance. (For example, an existing residential structure in the floodway is a nonconforming use).

Nonflood Disaster. A fire or an ice storm, tornado, windstorm, mudslide, or other destructive act of nature, other than a flood.

Nuisance. An unreasonable activity or use of property that interferes substantially with the comfortable enjoyment of life, health, or safety of others.

Objecting Agency. An agency empowered to object to a subdivision plat pursuant to Chapter 236 of the Wisconsin Statutes. The County may not approve any plat upon which an objection has been made until the objection has been satisfied. The objecting agencies include the Wisconsin Department of Administration, the Wisconsin Department of Commerce, the Wisconsin Department of Transportation, and, for subdivisions located in the shoreland area, the Wisconsin Department of Natural Resources.

Obstruction to Flow. Any development which physically blocks the conveyance of floodwaters such that the development by itself or in conjunction with future development will cause an increase in regional flood height.

Official Floodplain Zoning Map. The maps adopted and made part of this ordinance, as described in section 7.0201, which have been approved by the Department of Natural Resources and FEMA.

Open Space Use. Those uses having a relatively low flood damage potential and not involving structures.

Ordinary High Water Mark. The point on the bank or shore up to which the presence and action of surface water is so continuous as to leave a distinctive mark such as by erosion, destruction, or prevention of terrestrial vegetation, predominance of aquatic vegetation, or other easily recognized characteristics.

Outlot. A parcel of land, other than a buildable lot or block, so designated on a plat, which is used to convey or reserve areas of land. Outlots may be created to restrict a lot which is unbuildable due to high groundwater, steep slopes, or other physical constraints, or to create common open space. Outlots may also be parcels of land intended to be re-divided into lots or combined with lots or outlots in adjacent land divisions in the future for the purpose of creating buildable lots. An outlot may also be created if a lot fails to meet requirements for a private onsite wastewater treatment system, but which may be buildable if public sewer is extended to the lot or land division.

Section 236.13 (6) of the Wisconsin Statutes prohibits using an outlot as a building site unless it complies with all the requirements imposed for buildable lots. The County will generally require that any restrictions related to an outlot be included on the face of the plat.

Parcel. For purposes of this ordinance, the term “parcel” is synonymous with the term “lot.”

Parties-in-Interest. All abutting property owners and all property owners within 300 feet of a parcel that is to be considered for a rezoning or is subject to an appeal, variance, conditional use permit, or substitute nonconforming use to be considered by the Board of Adjustment. The application of the 300-foot rule is not affected by town, village, or city corporate limit lines.

Permitted Use. A use allowed in a zoning district upon satisfaction of the standards and requirements of this ordinance and the zoning ordinance of the town, village, or city within which a property is located.

Person. An individual, or group of individuals, corporation, partnership, association, state agency, town, village, or city.

Pier. Any structure extending into navigable waters from the shore with water on both sides, built or maintained for the purpose of providing a berth for watercraft or for loading or unloading cargo or passengers onto or from watercraft. Such a structure may include a boat shelter which is removed seasonally. Such a structure may include a boat hoist or boat lift, and the hoist or lift may be permanent or may be removed seasonally.

Plat. A map prepared for the purpose of recording a subdivision.

Preliminary Plat. A map showing the salient features of a proposed subdivision submitted to an approving authority for purposes of preliminary consideration. A preliminary plat precisely describes the location and exterior boundaries of the land proposed to be divided, and shows the approximate location of lots and other improvements.

Primary Environmental Corridor. A concentration of significant natural resources at least 400 acres in area, at least two miles in length, and at least 200 feet in width, as delineated and mapped by the Southeastern Wisconsin Regional Planning Commission.

Principal Structure. A structure in which is conducted the principal use of the lot on which it is located.

Principal Use. The primary or predominant use to which a lot is devoted.

Private Onsite Wastewater Treatment System. See “Private Sewage System.”

Private Sewage System. A sewage treatment and disposal system serving a single structure with a septic tank and soil absorption field located on the same parcel as the structure. This term also means an alternative sewage system approved by the Wisconsin Department of Commerce, including a substitute for the septic tank or soil absorption field, a holding tank, a system serving more than one structure, or a system located on a different parcel than the structure. A private sewage system may be owned by the landowner or by a special purpose district.

Public Utilities. Those utilities using underground or overhead transmission lines such as electric, telephone and telegraph, and distribution and collection systems such as water, sanitary sewer and storm sewer.

Ravine. A small, steep sided valley, worn by running water.

Ravine, Shallow. A small steep sided valley, worn by running water, that does not exceed 20 feet in depth when measured from the bottom of the ravine to the horizontal level of the land adjacent to the ravine.

Reasonably Safe From Flooding. A situation where regional flood waters will not inundate the land or damage structures to be removed from a flood hazard area, and where subsurface waters related to the regional flood will not damage existing or proposed buildings.

Recreational Vehicle. A vehicle used for transient living quarters which can be towed, hauled, or driven and is designed for recreational, camping, or travel use which includes, but is not limited to, travel trailers, camper trailers, motor homes, pickup campers, water craft, all-terrain vehicles, and snowmobiles. Recreational vehicles that remain onsite more than 180 days shall be considered mobile homes for the purposes of this ordinance.

Regional Flood. A flood determined to be representative of large floods known to have occurred in Wisconsin. A regional flood is a flood with a one percent chance of being equaled or exceeded in any given year.

Replat. The process of changing, or the plat or map which changes, the boundaries of a recorded subdivision plat, certified survey map, or a part thereof, including the combination of two or more lots or parcels within a plat or certified survey map. The division of a large block, lot, or outlot within a recorded subdivision plat without changing the exterior boundaries of said block, lot, or outlot is not a replat, but may need to be reviewed as a land division under this ordinance.

Setback. The minimum horizontal distance by which a building or structure must be separated from a lot line, street centerline, ordinary high water mark, or a wetland.

Shoreland. The area within the following distances from the ordinary high water mark of navigable waters: 1,000 feet from a lake, pond, or flowage; and 300 feet from a river or stream or to the landward side of the floodplain, whichever distance is greater.

Shoreline. The intersection of the land surface abutting navigable waters with the ordinary high water mark.

Stable Slope Distance. The horizontal distance that the top of a bluff would need to be receded or regraded to form a stable bluff slope that would not likely be affected by major bluff recession processes such as slumping or sliding.

Start of Construction. The date a zoning permit is issued, provided the actual start of construction, repair, reconstruction, rehabilitation, addition, placement, or other improvement is within 180 days of the permit date. The actual start means either the first placement of permanent construction on a site, such as the pouring of a slab or footings, the installation of piles, the construction of columns, or any work beyond initial excavation, or the placement of a manufactured home on a foundation. Permanent construction does not include land preparation, such as clearing, grading and filling, nor does it include the installation of streets and/or walkways, nor does it include excavation for a basement, footings, piers, or foundations or the erection of temporary forms, nor does it include the installation on the property of accessory buildings, such as garages or sheds not occupied as dwelling units or not part of the principal structure. For an alteration, the actual start of construction means the first alteration of any wall, ceiling, floor, or other structural part of a building, whether or not that alteration affects the external dimensions of the building.

Stipulated Permit. A permit issued by the Zoning Administrator subject to specified standards or conditions (stipulations).

Story. That portion of a building included between the surface of any floor and the surface of the floor next above it, or if there is no floor above it, then the space between the floor and the ceiling next above it and including those basements used for the principal use.

Street. Any public or private thoroughfare abutting a lot that is an existing State, County, or Town roadway; is shown upon a subdivision plat or certified survey map approved pursuant to law; or is approved by other official action. The street includes all land within the right-of-way, whether improved or unimproved.

Structure. Any human-made object with form, shape, and utility, either permanently or temporarily attached to, placed upon, or set into the ground, stream bed, or lake bed, which includes, but is not limited to, such objects as roofed and walled buildings, gas or liquid storage tanks, bridges, dams, culverts, and signs.

Structural Alterations. Any change in the supporting members of a structure, such as foundations, bearing walls, columns, beams, or girders.

Subdivider. Any person, firm or corporation, or any agent thereof, dividing or proposing to divide land resulting in a land division or replat, or any person who creates a condominium under Chapter 703 of the Wisconsin Statutes.

Subdivision. A division of land for which approval of a plat is required under Chapter 236 of the Wisconsin Statutes.

Substantial Improvement. Any structural repair, reconstruction, or improvement of a nonconforming structure, the cost of which equals or exceeds 50 percent of the present equalized value of the structure either before the improvement or repair is started, or if the structure has been damaged and is being restored, before the damage occurred. "Substantial improvement" begins when the first alteration of any wall, ceiling, floor, or other structural part of the building commences, whether or not that alteration affects the external dimensions of the structure. The term does not include: 1) a project for improvement of a structure to comply with existing state or local health, sanitary, or safety code requirements which are solely necessary to assure safe living conditions; 2) an alteration of a designated historic structure or site documented by the Wisconsin State Historical Society as deserving preservation or listed on the National Register of Historic Places, provided the alteration will not preclude the structure's continued designation as a historic structure; or 3) ordinary maintenance repairs, including internal and external painting, decorating, paneling, and the replacement of doors, windows, and other nonstructural components.

Unnecessary Hardship. That circumstance where special conditions affecting a particular property, which were not self-created, make strict conformity with the restrictions governing dimensional standards, such as lot area, lot width, or setbacks, unnecessarily burdensome or unreasonable in light of the purpose of this ordinance.

Utilities. Public and private facilities such as water wells, water and sewage pumping stations, water storage tanks, power and communication transmission lines, electrical power substations, static transformer stations, telephone and telegraph exchanges, microwave radio relays, and gas regulation stations, but not including sewage disposal plants, municipal incinerators, warehouses, wireless communication facilities, shops, and storage yards.

Variance. An authorization granted by the Board of Adjustment for the construction, maintenance, or alteration of a structure in a manner that deviates from the dimensional standards of this ordinance. A variance may not permit the use of a property that is otherwise prohibited by this ordinance.

Violation. The failure of a structure or other development to be fully compliant with this ordinance. A structure or other development without required permits, lowest floor elevation documentation, floodproofing certificates, or required floodway encroachment calculations is presumed to be in violation until such time as that documentation is provided.

Watershed. The entire region or area contributing runoff or surface water to a particular watercourse or body of water.

Water Surface Profile. A graphical representation showing the elevation of the water surface of a watercourse for each position along a reach of river or stream at a certain flood flow. A water surface profile of the regional flood is used in regulating floodplain areas.

Well. An excavation opening in the ground made by digging, boring, drilling, driving or other methods, to obtain groundwater regardless of its intended use.

Wetlands. Those areas where water is at, near or above the land surface long enough to be capable of supporting aquatic or hydrophytic vegetation and which have soils indicative of wet conditions.

Wharf. A structure in navigable waters extending along the shore and generally connected with the uplands throughout its length, built or maintained for the purpose of providing a berth for watercraft or for loading or unloading cargo or passengers onto or from watercraft. Such a structure may include a boat hoist or boat lift, and the hoist or lift may be permanent or may be removed seasonally.

Yard. An open space on the same lot with a structure, unoccupied and unobstructed from the ground upward except for vegetation. The street, shoreyard, and rear yards extend across the full width or depth of the lot.

Yard, Shore. A yard extending across the full width or depth of a lot, the depth of which shall be the minimum horizontal distance between a line intersecting both side lot lines at the same angle and containing the point of the ordinary high water mark of a navigable water nearest the principal structure and a line parallel thereto containing the point of the principal structure nearest the ordinary high water mark.

Zoning Administrator. The officer appointed by the County Board to administer this ordinance and to issue zoning permits and stipulated permits; and, following a determination by the Zoning Board of Adjustment, conditional use permits and variances.

Zoning Permit. A permit issued by the Zoning Administrator for construction, moving, alteration, or addition to any use, structure, or structure and use in combination upon compliance with the provisions of this ordinance or an authorized variance therefrom.

SECTION 7.1400 ADOPTION AND EFFECTIVE DATE

- 7.1400 ENVIRONMENT AND LAND USE COMMITTEE HEARING AND RECOMMENDATION
The Environment and Land Use Committee of the Ozaukee County Board recommended the adoption of this ordinance at a meeting held on March 21, 2006, following a public hearing held on January 11, 2006.
- 7.1402 COUNTY BOARD APPROVAL
This ordinance was adopted by the Ozaukee County Board of Supervisors on April 5, 2006 (Ordinance No. 05-19).
- 7.1403 TOWN APPROVAL NOT REQUIRED
As provided in Section 59.692 (2) (a) of the Wisconsin Statutes, this ordinance shall not require approval nor be subject to disapproval by any Town or Town Board.
- 7.1404 EFFECTIVE DATE
This ordinance shall take effect as provided in Section 59.69 of the Wisconsin Statutes.

s/ Robert A. Brooks
County Board Chairperson

Date of Publication: April 13, 2006
Effective Date: April 13, 2006

SECTION	7.0100	INTRODUCTION	1
	7.0101	Authority	1
	7.0102	Title	1
	7.0103	Findings	1
	7.0104	Purpose.....	1
	7.0105	Abrogation and Greater Restrictions	2
	7.0106	Interpretation	2
	7.0107	Severability	2
	7.0108	Warning and Disclaimer of Liability	2
SECTION	7.0200	GENERAL PROVISIONS.....	3
	7.0201	Areas to be Regulated	3
	7.0202	Annexed Areas	4
	7.0203	Compliance	4
	7.0204	General Development Standards	4
	7.0205	Concurrent Districts	4
	7.0206	Municipal, County, and State Agencies Regulated.....	4
	7.0207	Compliance with the Americans with Disabilities Act	5
	7.0208	Sanitary Regulations	5
SECTION	7.0300	LOT, SITE, AND SETBACK REQUIREMENTS	6
	7.0301	General	6
	7.0302	Lots Not Served by Public Sanitary Sewer.....	6
	7.0303	Lots Served by Public Sanitary Sewer.....	6
	7.0304	Existing Substandard Lots.....	6
	7.0305	Boathouse Regulations.....	6
	7.0306	Setback from Navigable Waters	7
	7.0307	Protective Areas Adjacent to Streams, Lakes, and Wetlands	8
	7.0308	Erosion Hazard Setback from Bluffs.....	8
	7.0309	Erosion Hazard Setback from Ravines.....	8
SECTION	7.0400	REMOVAL OF SHORE COVER	11
	7.0401	Purpose.....	11
	7.0402	Removal of Shore Cover	11
	7.0403	Streets and Paths	11
	7.0404	Exceptions.....	11
SECTION	7.0500	FILLING, GRADING, LAGOONING, DREDGING, DITCHING AND EXCAVATING	12
	7.0501	Activities Requiring a Stipulated Permit	12
	7.0502	Permit Application	12
	7.0503	General Standards for Activities Requiring a Permit	13
	7.0504	Soil Conservation Practices.....	13

	7.0505	Agricultural Drainage Maintenance	13
SECTION	7.0600	SHORELAND-WETLAND DISTRICT.....	14
	7.0601	Purpose.....	14
	7.0602	Designation of Shoreland-Wetlands.....	14
	7.0603	Principal Uses	14
	7.0604	Prohibited Uses	16
	7.0605	Rezoning of Lands in the Shoreland-Wetland District.....	16
SECTION	7.0700	FLOODPLAIN DISTRICTS	17
	7.0701	Floodplain Areas to be Regulated	17
	7.0702	Determination of Floodplain Boundaries	17
	7.0703	Removal of Lands from Floodplain	17
	7.0704	Watercourse Alterations	17
	7.0705	Development Requiring A Chapter 30 or Chapter 31 Permit.....	18
	7.0706	Hydraulic and Hydrologic Analysis	18
	7.0707	Establishment of Districts	18
	7.0708	Floodway District.....	18
	7.0709	Floodfringe District.....	21
	7.0710	General Floodplain District.....	23
	7.0711	Floodproofing Requirements.....	24
	7.0712	Dryland Access Requirements	24
SECTION	7.0800	NONCONFORMING USES AND STRUCTURES	25
	7.0801	Requirements for Nonconforming Uses and Structures Located Outside the Floodplain	25
	7.0802	Requirements for Nonconforming Uses and Structures Located Within the Floodplain	25
	7.0803	Changes and Substitutions	28
SECTION	7.0900	ADMINISTRATION	29
	7.0901	Environment and Land Use Committee	29
	7.0902	Public Information	29
	7.0903	Zoning Administrator	29
	7.0904	Zoning Permit	30
	7.0905	Stipulated Permit.....	32
	7.0906	Certificate of Compliance	32
	7.0907	Other Permits	33
	7.0908	Permit Fees.....	33
	7.0909	Double Fee.....	33
	7.0910	Remedial Action.....	33
	7.0911	Enforcement and Penalties	33

SECTION	7.1000	BOARD OF ADJUSTMENT	35
	7.1001	Establishment	35
	7.1002	Membership	35
	7.1003	Organization.....	35
	7.1004	Powers and Duties.....	35
	7.1005	Appeals to the Board.....	36
	7.1006	Variances	37
	7.1007	Conditional Use Permits.....	38
	7.1008	Hearings	40
	7.1009	Decision	41
	7.1010	Review by Court of Record.....	41
SECTION	7.1100	CHANGES AND AMENDMENTS	42
	7.1101	Authority	42
	7.1102	Procedure	42
	7.1103	Zoning Amendments in Annexed Areas	43
	7.1104	Floodplain District Amendments.....	44
	7.1105	Shoreland-Wetland District Amendments	44
SECTION	7.1200	LAND DIVISION REQUIREMENTS	46
	7.1201	General Provisions	46
	7.1202	Land Suitability	46
	7.1203	Dedication of Lands	46
	7.1204	Improvements.....	47
	7.1205	Preapplication Process.....	49
	7.1206	Preliminary Plat.....	49
	7.1207	Final Plat.....	50
	7.1208	Certified Survey Map.....	51
	7.1209	Review Criteria	51
	7.1210	Replats	51
	7.1211	Appeals	52
SECTION	7.1300	DEFINITIONS.....	53
	7.1301	General Definitions	53
	7.1302	Specific Words and Phrases	53
SECTION	7.1400	ADOPTION AND EFFECTIVE DATE.....	66
	7.1401	Environment and Land Use Committee Hearing and Recommendation	66
	7.1402	County Board Approval	66
	7.1403	Town Approval Not Required	66
	7.1404	Effective Date.....	66
Figure 1		Determining Setbacks from Bluffs and Ravines.....	10
